THIRTEENTH ANNUAL REPORT
OF THE
BUREAU OF INDUSTRIES.
PARTS I, II AND III.
1894.

TO THE HONORABLE MINISTER OF AGRICULTURE :

SIR,—I have the honor to present herewith Parts I, II, and III of the thirteenth annual report of the Bureau of Industries, being the Agricultural Statistics of Ontario for the year 1894.

I have the honor to be, Sir,

Your obedient servant,

C. C. JAMES,
Secretary.

TORONTO, Sept. 12th, 1895.

ERRATA.

An error due to the omission of 12,000 acres of oats yielding 304,800 bushels, from the County of Northumberland, necessitates the following changes in the earlier portions of this report. The corrections have been made in the later stages :

On page 5, first table, oats *read* 2,342,766 acres instead of 2,330,766 in 1894 ; and *read* 1,751,763 acres instead of 1,750,840 in 1882-94. For total *read* 8,227,153 instead of 8,215,153 in 1894, and *read* 7,656,771 instead of 7,655,848 in 1882-94.

On page 5, second table, 1894, *read* 1,687,718 instead of 1,675,718 in Lake Ontario, and *read* 8,227,153 instead of 8,215,153 for the Province. For 1882-94 *read* 1,631,687 instead of 1,630,704 in Lake Ontario, and *read* 7,656,771 instead of 7,655,848 for the Province.

On page 6, Lake Ontario, oats, *read* 178.2 instead of 173.2 in 1894, and *read* 134.7 instead of 134.3 in 1882-94 ; in total *read* 715.7 instead of 710.7 in 1894, and *read* 719.3 instead of 718.9 in 1882-94. For Province, oats, *read* 190.6 instead of 189.6 in 1894, and *read* 154.9 instead of 154.8 in 1882-94 ; in total *read* 669.3 instead of 668.3 in 1894, and *read* 677.0 instead of 676.9 in 1882-94.

On page 11, first table, Lake Ontario, *read* 420,356 acres, 12,153,774 bushels and 28.9 bushels per acre, instead of 408,356 acres, 11,848,974 bushels and 29.0 bushels per acre in 1894, and *read* 305,466 acres, 10,791,661 bushels and 35.3 bushels per acre, instead of 304,543 acres, 10,768,205 bushels and 35.4 bushels per acre in 1882-94. In totals *read* 2,342,766 acres, 70,172,516 bushels instead of 2,330,766 acres and 69,867,716 bushels in 1894, and *read* 1,751,763 acres, 59,817,069 bushels instead of 1,750,840 acres, 59,793,563 bushels in 1882-94.

On page 20, first table, oats, *read* 70,172,516 bushels instead of 69,867,716 in 1894, and *read* 59,817,009 bushels instead of 59,793,563 bushels in 1882-94.

On page 36, Northumberland, *read* 42,474 acres, 1,078,840 bushels instead of 30,474 acres, 774,040 bushels in 1894, and *read* 32,061 acres, 937,442 bushels, 29.2 bushels per acre instead of 31,138 acres, 913,996 bushels and 29.4 bushels per acre in 1882-94. In totals and for Province *read* as on page 11.

On page 47, oats, *read* 115 instead of 85 in Northumberland, and *read* 113 instead of 110 in the group.

On page 48, oats, Northumberland, *read* 87 instead of 86.

CONTENTS.

LETTER OF TRANSMISSION.	PAGE
ERRATA.	iii.
PART I—THE WEATHER AND THE CROPS.	
THE WEATHER :	1
Temperature for the six months April-September, 1—Sunshine during April-September, 2—Precipitation of rain and snow during November-March, 1893-94, 3—Rainfall during April-September, 3.	
FARM LANDS OF THE PROVINCE :	4
Rural areas assessed, 4—Area in pasture, 4—Area in crops, 5—Area in crops by county groups, 5—Proportional areas under crop, 6.	
FALL WHEAT :	6
Condition of the crop, 6—Table giving area and yield by county groups, 8—The new crop of fall wheat, 8.	
SPRING WHEAT :	8
Condition of the crop, 8—Table giving acreage and yield by county groups, 9.	
BARLEY :	9
Condition of the crop, 9—Table giving acreage and yield by county groups, 10.	
OATS :	10
Condition of the crop, 10—Table giving acreage and yield by county groups, 11.	
RYE :	11
Condition of the crop, 11—Table giving acreage and yield by county groups, 11.	
PEAS :	12
Condition of the crop, 12—Table giving acreage and yield by county groups, 12.	
CORN :	13
Condition of the crop, 13—Table giving acreage and yield by county groups, 13—Remarks of correspondents, 14.	
BUCKWHEAT :	14
Condition of the crop, 14—Table giving acreage and yield by county groups, 15.	
BEANS :	15
Condition of the crop, 15—Table giving acreage and yield by county groups, 15.	
FIELD ROOTS :	16
Potatoes, 16—Mangel-wurzels, 17—Carrots, 17—Turnips, 18.	
HAY AND CLOVER :	18
Condition of the crop, 18—Table giving acreage and yield by county groups, 19.	
COMPARATIVE YIELDS OF FIELD CROPS :	20
Aggregate yield of field crops, 20—Average yields per acre, 20—Ratios of aggregate crops, 21—Ratios of yield per acre, 21.	
FRUIT AND FRUIT TREES :	22
General condition of orchards during the year, 22—Remarks of correspondents, 22—Area in orchard and garden, 23.	
FARM SUPPLIES :	23
FALL PLOWING :	24
THRESHING AND MARKETING :	24
FARM IMPROVEMENTS :	24
STATISTICS OF THE WEATHER AND THE CROPS :	25
TABLE I. Showing for each month the highest, lowest, mean highest, mean lowest, and mean temperature at the principal stations in Ontario in 1894 ; also the annual mean for each station..	26
TABLE II. Showing for each month the annual average of the highest, lowest, mean highest, mean lowest and mean temperature at the principal stations in Ontario, derived for the thirteen years 1882-94 ; also the average annual mean at each station for the same period.....	27
TABLE III. Monthly summary of bright sunshine at the principal stations in Ontario in 1894, showing the number of hours the sun was above the horizon, the hours of registered sunshine, and the total for the year ; also the average derived for the thirteen years 1882-94.....	28
TABLE IV. Monthly summary of inches of rain and snow precipitation in the several districts of Ontario in 1894 ; also the average derived for the thirteen years 1882-94.....	28

	PAGE
TABLE V. Summary of the total fall of rain and snow, and of the number of days on which rain or snow fell in Ontario during the years 1893 and 1894 at stations reporting for the whole year and the average for the province.....	29
TABLE VI. Comparative meteorological register for the seven years 1888-94, as recorded at Toronto Observatory	31
TABLE VII. Showing by county municipalities and groups of counties the rural area of Ontario as returned by municipal assessors for 1894	32
TABLE VIII. Showing by county municipalities and groups of counties the area and produce of fall wheat in Ontario in the years 1893 and 1894, with the yearly average for the thirteen years 1882-94; also the yield per acre	33
TABLE IX. Showing by county municipalities and groups of counties the area and produce of spring wheat in Ontario in the years 1893 and 1894, with the yearly average for the thirteen years 1882-94; also the yield per acre.....	34
TABLE X. Showing by county municipalities and groups of counties the area and produce of barley in Ontario in the years 1893 and 1894, with the yearly average for the thirteen years 1882-94; also the yield per acre.....	35
TABLE XI. Showing by county municipalities and groups of counties the area and produce of oats in Ontario in the years 1893 and 1894, with the yearly average for the thirteen years 1882-94; also the yield per acre.....	36
TABLE XII. Showing by county municipalities and groups of counties the area and produce of rye in Ontario for the years 1893 and 1894, with the yearly average for the thirteen years 1882-94; also the yield per acre.....	37
TABLE XIII. Showing by county municipalities and groups of counties the area and produce of peas in Ontario in the years 1893 and 1894, with the yearly average for the thirteen years 1882-94; also the yield per acre.....	38
TABLE XIV. Showing by county municipalities and groups of counties the area, produce and yield per acre of corn for husking and for silo and fodder for the year 1894, also the total acreage for 1893 and 1894, with the yearly average for the thirteen years 1882-94	39
TABLE XV. Showing by county municipalities and groups of counties the area and produce of buckwheat in Ontario in the years 1893 and 1894, with the yearly average for the thirteen years 1882-94; also the yield per acre	40
TABLE XVI. Showing by county municipalities and groups of counties the area and produce of beans in Ontario in the years 1893 and 1894 with the yearly average for the thirteen years 1882-94; also the yield per acre.....	41
TABLE XVII. Showing by county municipalities and groups of counties the area and produce of hay and clover in Ontario in the years 1893 and 1894, with the yearly average for the thirteen years 1882-94; also the yield per acre.....	42
TABLE XVIII. Showing by county municipalities and groups of counties the area and produce of potatoes in Ontario in the years 1893 and 1894, with the yearly average the thirteen years 1882-94; also the yield per acre.....	43
TABLE XIX. Showing by county municipalities and groups of counties the area and produce of mangel-wurzels in Ontario in the years 1893 and 1894, with the yearly average for the thirteen years 1882-94; also the yield per acre.....	44
TABLE XX. Showing by county municipalities and groups of counties the area and produce of carrots in Ontario for the years 1893 and 1894, with the yearly average for the thirteen years 1882-94; also the yield per acre.....	45
TABLE XXI. Showing by county municipalities and groups of counties the area and produce of turnips in Ontario in the years 1893 and 1894, with the yearly average for the thirteen years 1882-94; also the yield per acre.....	46
TABLE XXII. Showing by county municipalities and groups of counties the per cent. ratios of total yields in 1894 to average of total yields for the thirteen years 1882-94	47
TABLE XXIII. Showing by county municipalities and groups of counties the per cent. ratios of average yields per acre in 1894 to average yields per acre for the thirteen years 1882-94.....	48
TABLE XXIV. Showing by county municipalities and groups of counties the total area under crop enumerated in tables viii-xxi, for the years 1893 and 1894, with the yearly average for the thirteen years 1882-94; also the area in pasture and in orchard and garden for the same period	49
TABLE XXV. Showing by county municipalities and groups of counties the number of acres under the various crops in Ontario in 1894 per 1,000 acres of cleared land	50
TABLE XXVI. A comparison of the average yield per acre of cereals in Ontario and the principal grain-growing States of the American Union and of Manitoba is presented in the following table for the ten years 1885-94	51
TABLE XXVII. Principal crops of United States in 1894	52
TABLE XXVIII. The world's wheat crop for six years	53
TABLE XXIX. Wheat crops of the United States, 1880-1894.....	54
GENERAL REMARKS OF CORRESPONDENTS.....	55

PART II—LIVE STOCK, THE DAIRY AND THE APIARY.

PAGE

LIVE STOCK :

59

General review of the condition of live stock in Ontario during 1894, 59—Remarks by correspondents, 60—Table showing by county groups the number of horses for the five years 1890-94, 61—Table showing by county groups the number of hogs for the five years 1890-94, 61—Table showing by county groups the number of cattle for the five years 1890-94, 62—Table showing by county groups the number of sheep for the five years 1890-94, 62—Table showing by county groups the number of poultry for the five years 1890-94, 63—Remarks of correspondents, 63—Table showing by county groups the wool clip in 1893 and 1894, with the yearly average for the thirteen years 1882-94, 66—Table showing by county groups the number of live stock sold in years ending June 30th, 1893 and 1894, 67.

THE APIARY :

67

General condition of bees, 67—No. of hives and value of apiary outfit, 68.

THE DAIRY :

68

General review, 68—Table giving statistics for all factories for the twelve years 1883-94, 69—Monthly statistics of cheese factories, 70—Table giving the statistics of creameries, 70.

CHEESE FACTORIES AND CREAMERIES IN ONTARIO :

74

List of factories in operation in 1894, with name and post office address of the secretary of each factory, 74—Creameries in Ontario in 1894, 90—List of cheese and butter Boards, 92.

STATISTICS OF LIVE STOCK AND DAIRY PRODUCTS :

93

TABLE I. Showing by county municipalities and groups of counties the number of horses and hogs in Ontario in the years 1893-94 94

TABLE II. Showing by county municipalities and groups of counties the number of cattle in Ontario in the years 1893 and 1894 95

TABLE III. Showing by county municipalities and groups of counties the number of sheep and poultry in Ontario in the years 1893 and 1894 96

TABLE IV. Showing by county municipalities and groups of counties the number of horses, cattle, sheep, hogs and poultry sold in the Province of Ontario in the years ending June 30, 1893 and 1894 97

TABLE V. Showing by county municipalities and groups of counties the clip of wool in Ontario in the years 1893 and 1894, with the yearly average for the thirteen years 1882-94; also the average number of pounds per fleece 98

TABLE VI. Showing by county municipalities and groups of counties the quantity and value of cheese made at 656 factories in Ontario in 1894, the amount paid to patrons, and the total number of factories reported in operation 99

TABLE VII. Showing by county municipalities and groups of counties the number of hives of bees kept in said municipalities for the years 1892, 1893 and 1894, and the value of same for the years 1893 and 1894 100

PART III—VALUES, RENTS AND FARM WAGES.

VALUES OF FARM PROPERTY :

101

Comparative table showing by county groups the value of farm lands, buildings, implements and live stock for the years 1893 and 1894, and for the province for the twelve years 1883-94, 101—Values per acre, 102—Rental of leased farms, 103.

VALUES OF LIVE STOCK :

104

Value of horses, 104—Value of cattle, 104—Values of sheep and of hogs, 105—Values of poultry and of total live stock, 105—Value of live stock per head, 106.

VALUES OF CROPS :

107

Market prices, 107—Value of crops, 107—Crop values by county groups, 108—Value of produce per acre under crop, 108—Per cent. ratios of values per acre, 109.

FARM LABOR AND WAGES :

109

Wages of farm laborers and domestic servants, 110—Domestic servants on the farm, 111.

STATISTICS OF VALUES, RENTS AND FARM WAGES :	PAGE
TABLE I. Showing by county municipalities and groups of counties the values of farm land, buildings and implements in Ontario in 1893 and 1894	113
TABLE II. Showing by county municipalities and groups of counties the values of farm live stock and total farm property in Ontario in 1893 and 1894, also the rent per acre of leased farms as reported in 1894, with the averages derived for the nine years 1886-94.....	114
TABLE III. Showing by county municipalities and groups of counties the average value per acre occupied of farm land, buildings, implements and live stock in Ontario for the years 1893 and 1894.....	115
TABLE IV. Showing by county municipalities and groups of counties the value of horses, milch cows, other cattle and the total cattle for the years 1893 and 1894	116
TABLE V. Showing by county municipalities and groups of counties the value of sheep, hogs and poultry for the years 1893 and 1894.....	117
TABLE VI. Showing by county municipalities and groups of counties the value of live stock sold or killed in the years ending June 30, 1893 and 1894	118
TABLE VII. Showing by county municipalities and groups of counties the value per head of the several classes of horses and cattle in the province for the year 1894, and also the value per head of all the horses and cattle sold for the same period.....	119
TABLE VIII. Showing by county municipalities and groups of counties the value per head of sheep, hogs and poultry in the province for the year 1894, and also the value of each per head sold for the same period.....	120
TABLE IX. Showing the average price of agricultural products at the leading markets of Ontario for July-December, 1894, and the average for the half year and for the province.....	121
TABLE X. Showing by county municipalities and groups of counties the value at market prices of the total crop of fall and spring wheat in Ontario in the years 1893 and 1894, with the yearly average for the thirteen years 1882-94.....	122
TABLE XI. Showing by county municipalities and groups of counties the value at market prices of the total crop of barley and oats in Ontario in the years 1893 and 1894, with the yearly average for the thirteen years 1882-94	126
TABLE XII. Showing by county municipalities and groups of counties the value at market prices of the total crop of rye and peas in Ontario in the years 1893 and 1894, with the yearly average for the thirteen years 1882-94.....	127
TABLE XIII. Showing by county municipalities and groups of counties the value at market prices of the total crop of corn (for husking and silo) and buckwheat in Ontario in the years 1893 and 1894, with the yearly average for the thirteen years 1882-94.....	128
TABLE XIV. Showing by county municipalities and groups of counties the value at market prices of the total crop of beans and potatoes in Ontario in the years 1893 and 1894, with the yearly average for the thirteen years 1882-94.....	129
TABLE XV. Showing by county municipalities and groups of counties the value at market prices of the total crop of mangel-wurzels and carrots in Ontario in the years 1893 and 1894, with the yearly average for the thirteen years 1882-94 ..	130
TABLE XVI. Showing by county municipalities and groups of counties the value at market prices of the total crop of turnips and hay and clover in Ontario in the years 1893 and 1894, with the yearly average for the thirteen years 1882-94.....	131
TABLE XVII. Showing by county municipalities and groups of counties the aggregate value of all field crops in Ontario in the years 1893 and 1894, with the yearly average for the thirteen years 1882-94; also the value at market price of the total clip of wool in 1893 and 1894, with the yearly average for the thirteen years 1882-94.....	132
TABLE XVIII. Showing by county municipalities and groups of counties the market value of crop per acre of wheat and barley in Ontario in 1893 and 1894, with the yearly average for the thirteen years 1882-94	133
TABLE XIX. Showing by county municipalities and groups of counties the market value of crop per acre of oats, rye and peas in Ontario in 1893 and 1894, with the yearly average for the thirteen years 1882-94.....	134
TABLE XX. Showing by county municipalities and groups of counties the average market value of crop per acre of corn, buckwheat and beans in Ontario in 1893 and 1894, with the yearly average for the thirteen years 1882-94.....	135
TABLE XXI. Showing by county municipalities and groups of counties the market value of crop per acre of potatoes, mangel-wurzels and carrots in Ontario in the years 1893 and 1894, with the yearly average for the thirteen years 1882-94.....	136
TABLE XXII. Showing by county municipalities and groups of counties the market value per acre of turnips, hay and clover and all field crops in Ontario in the years 1893 and 1894, with the yearly average for the thirteen years 1882-94.....	137
TABLE XXIII. Showing by county municipalities and groups of counties the average wages of farm laborers and domestic servants in Ontario in 1893 and 1894	138
	139

PART I.

THE WEATHER AND THE CROPS.

THE WEATHER.

Temperature, sunshine and precipitation, each and all, play an important part in the matter of the growth and development of plant life. The disastrous results of an untimely frost is easily apparent; the more subtle function and effects of sunshine are less readily comprehended; while the fall of rain or snow, or the withholding of the precipitation at a time of need, may mean the saving or losing of a crop. For these reasons the tables more immediately following should furnish an interesting study.

TEMPERATURE. The following table gives the temperature from April to September inclusive—practically the growing season—at ten well distributed points in Ontario, for the years 1893 and 1894, and also the average for the thirteen years, 1882-94:

Months.	Saugeen.	Birnam.	London.	Woodstock.	Stony Creek.	Toronto.	Lindsay.	Gravenhurst.	Ottawa.	Rockliffe.	Province average.
	o	o	o	o	o	o	o	o	o	o	o
April.....	1894 .. 41.77	44.60	47.36	44.08	45.90	44.37	44.01	43.61	45.99	41.63	44.33

Mean for six months	1894 .. 56.83	60.87	63.88	59.86	63.43	60.00	58.94	58.69	59.52	55.11	59.72
	1893 .. 55.85	59.56	61.94	59.42	61.76	58.13	57.05	56.96	57.34	53.51	58.15
	1882-94 55.34	58.94	59.97	58.75	60.66	58.03	57.00	56.62	58.33	54.37	57.82

Every station exhibits an increase in the mean temperature for the six months, the average for the Province being 59.72° , which is 1.57° above that of the preceding year, and 1.90° above the average of the thirteen years, 1882-94. Taking the table by months, however, it will be observed that the temperature of June was lower than in the same month of the previous year, but higher than its average for the thirteen years, and that in August the temperature averaged lower than in 1893, and was also below the average for 1882-94. London exhibits a higher mean temperature for the six months than any of the other nine stations comprising the table, both for 1893 and 1894, but Stony Creek shows the highest average for the thirteen years. Rockliffe has the lowest mean temperature for the six months in the three periods, although in May and June it made a good showing compared with the figures for Saugeen.

SUNSHINE. Following is a table giving the record of sunshine at five stations during the six months April-September, for the years 1893 and 1894, and also the average for the twelve years 1883-94. The last column gives the figures of hours of possible sunshine calculated for latitude 45° .

Month.		Woodstock.	Toronto.	Barrie.	Lindsay.	Kingston.	Province average.	Sun above horizon, lat. 45° .
		hours.	hours.	hours.	hours.	hours.	hours.	hours.

August	{ 1894	207.2	227.7	217.5	183.4	200.8	207.3	} 434.5
	{ 1893	272.5	272.7	226.2	257.4	266.3	259.0	
	{ 1883-94..	232.0	249.1	215.5	249.9	243.8	238.1	
September	{ 1894	109.4	191.4	179.9	143.7	157.4	156.4	} 376.3
	{ 1893	87.7	217.8	198.5	185.9	189.3	175.8	
	{ 1883-94..	183.9	217.0	163.5	203.5	197.3	193.0	
Totals for six months	{ 1894	1245.0	1348.2	1297.1	1220.7	1284.4	1279.1	} 2614.9
	{ 1893	1126.8	1400.8	1343.6	1361.3	1399.9	1326.4	
	{ 1883-94..	1310.3	1420.4	1233.3	1404.2	1365.1	1346.7	

Of the 2,614.9 hours of possible sunshine in the six months there were only 1,279.1 hours experienced, or not one-half, which fall fully 47 hours below the figures for 1893, and over 67 hours more than the average for the twelve years, 1883-94. There was more sunshine in April than in the same month in the preceding year or the average of 1883-94, but in the other five months the figures do not reach those for 1893, although in June and July there is more sunshine than in the same months for the twelve years. The largest number of hours of sunshine were registered in Toronto, and the least in Lindsay.

PRECIPITATION. The fall of rain and snow in the winter months is given in the following table by districts for the years 1893-4 and 1892-3, together with the average

for the thirteen years, 1882-94. In connection with this table it is necessary to note that an inch of rain is the equivalent of ten inches of snow :

Month.	West and southwest.		Northwest and north.		Centre.		East and northeast.		Province average.	
	Rain.	Snow.	Rain.	Snow.	Rain.	Snow.	Rain.	Snow.	Rain.	Snow.
	in.	in.	in.	in.	in.	in.	in.	in.	in.	in.

	1893 .. 1.19	4.4	0.96	9.1	1.70	3.8	0.90	4.4	1.19	5.4
	1882-94 1.23	9.5	0.80	14.0	1.14	9.2	0.95	13.0	1.03	11.4
Totals for five months {	1894 .. 8.32	45.5	4.73	102.7	8.18	57.6	4.65	74.1	6.47	70.0
	1893 .. 5.67	71.2	3.87	93.0	6.43	72.2	4.52	74.1	5.12	77.6
	1882-94 8.25	58.3	5.73	98.9	7.55	59.1	5.72	93.1	6.81	77.4

The rainfall of the Province for the five months was 6.47 inches, or 1.35 inch more than in the preceding year, although 0.34 inch less than the average for the thirteen years. The heaviest rainfalls were experienced in the west and southwest and in the centre districts. The snowfall of the Province was 70 inches, which is over seven inches below that of both the previous year and the average for the thirteen years. The precipitation of snow reached 102.7 inches in the northwest and north district, while in the west and southwest district it was only 45.5 inches. There was a comparatively large fall of snow in December, but an exceedingly small one both in January and March. The two other months do not differ greatly from their respective averages for the thirteen years 1882-94.

The rainfall during April-September, the period of growth of leading crops, is, however, of greater importance than the winter precipitation, and the following table is therefore of much interest, as it gives the rainfall for each of the six months above named.

Months.	West and southwest.		Northwest and north.		Centre.		East and northeast.		Province average.	
	1894.	1882-94.	1894.	1882-94.	1894.	1882-94.	1894.	1882-94.	1894.	1882-94.
	in.	in.	in.	in.	in.	in.	in.	in.	in.	in.
April	1.40	1.81	0.90	1.42	0.86	1.60	0.79	1.38	0.99	1.55
May	6.25	3.54	4.20	2.62	7.46	3.07	4.96	2.77	5.72	3.00
June	1.73	3.31	2.48	2.83	2.25	3.14	2.82	2.92	2.32	3.05
July	1.54	2.42	1.46	2.58	1.75	2.34	2.15	2.89	1.72	2.56
August.....	0.34	2.58	1.48	2.70	0.52	2.53	1.02	2.85	0.84	2.67
September	3.94	2.53	3.62	3.04	4.71	2.57	2.64	2.55	3.73	2.67
Totals...	15.20	16.19	14.14	15.19	17.55	15.25	14.38	15.36	15.32	15.50

The precipitation for the six months is 15.32 inches, or 0.18 inch lower than the average for the thirteen years. The heaviest rainfall was experienced in the centre district

and the highest in the northwest and north district, but in the three other districts there was very little difference in the precipitation compared with one another or with the average of the Province for the year. April was an uncommonly dry month, not quite an inch of rain being recorded. May, on the other hand, almost doubled its average for the thirteen years. July had a rather small precipitation, but August experienced a remarkable drouth, having had only 0.84 of rain, or less than one-third of its normal precipitation. September had considerably more rain than usual. The three summer months, June, July and August, had but 4.88 inches of rain, compared with 8.28 inches in the same months for 1882-94.

FARM LANDS OF THE PROVINCE.

RURAL AREA ASSESSED. The following table gives the acreage assessed in townships which are municipally organized, by county groups, the total for the Province being given for all classes of land for 1893 and 1894:

Districts.	Acres assessed.			Acres cleared.		Acres woodland.	Acres swamp, marsh or waste.	Per cent. cleared.
	Resident.	Non-resident.	Total.	1894.	1893.			
Lake Erie	2,297,699	87,231	2,384,930	1,512,231	1,475,864	720,828	101,871	64.8
Lake Huron	2,230,971	64,406	2,304,377	1,420,489	1,391,229	607,538	276,350	61.6
Georgian Bay.	1,970,439	54,120	2,024,569	1,123,082	1,099,478	633,425	268,062	55.5
West Midland	3,218,435	86,373	3,254,808	2,388,731	2,366,991	556,574	309,503	73.4
Lake Ontario	3,004,878	43,827	3,048,705	2,357,777	2,347,536	431,307	259,621	77.3
St. Law. and Ottawa.	5,122,536	208,033	5,330,569	2,413,419	2,391,681	2,014,599	902,551	45.3
East Midland	2,562,424	135,617	2,698,041	890,515	879,779	1,378,760	428,766	33.0
Northern Districts..	1,616,417	426,358	2,042,975	186,366	179,006	1,516,683	339,926	9.1
The Province {	1894, 22,032,799	1,006,175	23,038,974	12,292,610	7,859,714	2,886,650	53.4
	1893, 21,940,726	1,018,554	22,959,280	12,131,564	8,133,229	2,694,487	52.8

There are 23,038,974 acres assessed in the rural area of the Province, which is a slight increase over the figures for the preceding year. Of this a little over half is cleared land, there being 7,859,714 in woodland and 2,886,650 in swamp, marsh or waste land. In the Lake Ontario group, however, 77.3 per cent of the land is cleared, and in the West Midland district 73.4 per cent.

AREA IN PASTURE. The table following shows the number of acres in pasture by county groups, and for the Province for each of the five years 1890-94, and also the percentage of cleared land in pasture in 1894:

Year.	Lake Erie.	Lake Huron.	Georgian Bay.	West Midland.	Lake Ontario.	St. Lawrence and Ottawa.	East Midland.	Northern Districts.	The Province.
	acres.	acres.	acres.	acres.	acres.	acres.	acres.	acres.	acres.
1894	247,580	369,178	233,935	519,802	388,225	711,042	200,979	32,550	2,703,241
1893	247,557	376,258	228,361	535,379	367,048	695,576	199,514	32,487	2,682,180
1892	238,565	350,067	222,765	504,588	360,243	673,231	184,389	28,191	2,562,040
1891	266,189	381,578	284,623	530,858	379,627	693,923	201,289	30,194	2,721,281
1890	246,107	339,984	214,561	513,612	369,063	641,597	195,303	21,865	2,542,092
Per cent. of cleared land in 1894	16.4	26.0	20.8	21.8	16.5	29.5	22.6	17.5	22.0

The number of acres in pasture in the Province is 2,703,241, which, while falling below the figures for 1891, shows an improvement over the figures given for 1892 and 1893. The percentage of pasture to the area cleared is estimated at 22.0 for the province, but the ratio rises as high as 29.5 in the dairying district known as the St. Lawrence and Ottawa, and to 26.0 in the Lake Huron group. In the Lake Erie district the percentage of pasture to farm land is only 16.4.

ACREAGE UNDER CROP. * The following table gives the acreage under crop for each of the five years 1890-94, and also the average for the thirteen years 1882-94 :

Field crops.	1894.	1893.	1892.	1891.	1890.	1882-94.
	acres.	acres.	acres.	acres.	acres.	acres.

Mangel-wurzels.....	27,670	21,519	22,026	22,961	25,953	20,514
Carrots.....	11,186	9,288	9,941	9,858	11,977	10,358
Turnips.....	147,637	136,604	129,627	126,075	111,055	112,563
Hay and clover.....	2,576,943	2,766,894	2,515,367	2,549,975	2,462,092	2,366,473
Total.....	8,215,153	8,054,612	8,080,206	7,834,213	7,912,297	7,655,848

The area under crop in the Province is 8,215,153 acres, which is an increase of 160,541 acres over the figures for the previous year. Hay and clover still claim the largest area, but this year's acreage is less than that of 1893, while oats have increased in area by nearly 400,000 acres. While there is a decline in the figures for both fall and spring wheat, the acreages of all classes of roots have been augmented. Corn, also, is steadily enlarging its acreage.

The following table gives the acreage of all the crops mentioned in the preceding table, and for the same periods, by county groups and for the Province :

Year.	Lake Erie.	Lake Huron.	Georgian Bay.	West Midland.	Lake Ontario.	St. Lawrence and Ottawa.	East Midland.	Northern Districts.	The Province.
	acres.	acres.	acres.	acres.	acres.	acres.	acres.	acres.	acres.
1894.....	1,047,297	873,424	758,184	1,594,356	1,675,718	1,529,255	596,254	140,665	8,215,153
1893.....	1,046,128	869,971	733,656	1,535,218	1,660,138	1,450,433	581,889	137,199	8,054,612
1892.....	1,002,829	869,630	733,539	1,542,550	1,696,482	1,503,724	593,111	138,341	8,080,206
1891.....	990,197	844,278	696,561	1,504,482	1,635,753	1,463,449	571,755	127,738	7,834,213
1890.....	996,955	851,934	696,361	1,539,165	1,669,314	1,474,437	569,117	115,014	7,912,297
Average									
1882-94.....	956,459	806,454	685,901	1,486,010	1,630,764	1,423,200	565,582	101,478	7,655,848

The chief feature of the table is the fact that in every county group an increase is observed when compared with any of the preceding four years, except in the case of the Lake Ontario district, which reached slightly higher figures in 1892 than in 1894.

PROPORTIONAL AREAS UNDER CROP: The following table gives the relative distribution of the various crops per 1,000 acres cleared, by county groups and for the Province, for 1893 and 1894, together with the average for the thirteen years 1882-94:

		Fall Wheat.	Spring Wheat.	Barley.	Oats.	Rye.	Peas.	Corn.	Buckwheat.	Beans.	Potatoes.	Mangel-wurzels.	Carrots.	Turnips.	Hay and Clover.	Total.
Lake Erie	1894	136.4	1.4	18.5	142.1	8.6	35.8	98.0	12.6	29.2	12.6	1.2	.7	2.6	192.9	692.6

Of the cleared land of the Province 668.3 acres out of every 1,000 were given to the crops heading the table, which is an increase of 3.3 as compared with the figures for the preceding year. The highest ratio is found in the more newly settled Northern Districts, but of the older groups the Lake Ontario has the largest proportionate extent of land under crop.

FALL WHEAT.

The bulletin issued in November, 1893, had the following paragraph in reference to the fall wheat then growing: "Reports vary regarding the acreage and condition of this crop, but speaking generally it may be said that the area of fall wheat in western Ontario (where the bulk of the crop is grown) has decreased, perhaps, ten per cent., while in the eastern half of the Province, in the counties ranging from Ontario to Leeds, a considerable increase is noted. The total area will be therefore less than usual, and while the crop in eastern Ontario is promising, having had an excellent start, that in the great fall wheat counties of the west is not so favorable, the ground being dry and hard at sowing, particularly on clays. Some western sections, notwithstanding the lower average, make a splendid showing both as regards acreage and condition, while adjoining sections claim

a shrinkage in fall wheat area of 25 per cent. A few correspondents make mention of Hessian fly and wire worm, but these are confined to two or three localities. Grasshoppers, however, did considerable damage in various sections. Sowing covered a period ranging from the 21st of August to the 7th of October, but the bulk of the crop was sown in the first two weeks of September. A request for the favorite variety of fall wheat has brought out a list that would rival a seedsman's catalogue, and which proves that our farmers are seeking the best that can be had. The Clawson (red and white), Manchester, Democrat, Hybrid Mediterranean, Surprise and Velvet Chaff appear to be the most popular in the order named, and as these are named as the leaders in favor in our bulletin of two years ago it would seem that none of the newer and much advertised varieties have so far been able to displace them."

The April reports were to the effect that the fall wheat crop had entered a most crucial period, and much uncertainty existed regarding its future prospects. Early in March, fine, bright weather prevailed, and the protecting covering of snow disappeared, revealing the fields of wheat in a promising condition in most quarters. The latter part of March and the early portion of April, however, was a season of alternate freezing and thawing, and the cold nights and warm days not only resulted in much "heaving," but browned the tender blades and left all but well-drained fields with an appearance anything but satisfactory. The situation at the time correspondents wrote was as follows: "Fall wheat has been seriously set back by spring frosts and absence of warm rains. Should another week or two of unpropitious weather prevail much of the crop will have to be plowed up or resown; but, as the roots are vigorous, timely showers and genial weather may carry the fields forward towards an average yield. Where the fields entered the winter with a good top they are still vigorous and green, and those who practice underdraining rejoice in an encouraging outlook." The great fall wheat counties along Lake Erie sent rather discouraging reports, and in the eastern portion of the province, where the acreage is small, the prospect was equally poor for a good crop. In the Lake Huron group, the county of Huron gave a cheerful report, while Lambton and Bruce were rather the reverse. The Georgian Bay counties' reports were unequal in tone, and on the whole the prospects were not as bright as usual. In the West Midland group the favorable reports prevailed over those of a less encouraging character, and the same may be said of the Lake Ontario counties. But little injury by worm or insects was reported.

Fall wheat was thus reported upon in the June bulletin: "This crop has stood the heavy rain and changes of weather much better than the spring crops. Throughout the entire Province some low lands have been flooded and the crop drowned out. On very heavy clays there has been some damage, but on light and loamy soils very little injury has resulted. The reports for this time of the year are quite up to the average. The frost of the first week of June was felt to a very slight extent. The reports from all parts of the province are practically the same—that after the rain the wheat soon picked up and showed less injury than had been supposed. Not more than usual has been plowed up and resown to spring grain. Heading out was in progress on the 15th. In some places the growth was quite rank. With favorable weather for the next three weeks a good crop of fall wheat may be looked for. At present the conditions promise an average yield. In the Lake Erie district the crop was fair to very good, except on low lands and very heavy clay. Damage by frost was very slight. In the Lake Huron district most of the reports are for a good crop. Some attention is given by correspondents to the benefits of drainage, which have been very apparent during the present season. In the Georgian Bay counties a small fraction of the crop has been lost, but on the whole it is quite up to the average. In the West Midland group the best reports come from Wellington and the worst from Middlesex, where, however the crop is reported fair. Along Lake Ontario reports are favorable for a fair crop—fully up to the average. In the eastern counties the amount of fall wheat is too small to affect the total, but reports are favorable. To sum up: The present condition is fair, with prospects of a crop quite up to, if not a little over, the average, with favorable weather."

The following regarding fall wheat appeared in the August bulletin: "All things considered, this is probably the most successful crop of the present season. The grain filled fairly well, and harvesting was completed in favorable weather. There are the

usual complaints as to rust, shrunken grain, etc., but they are not so numerous as usual. As to both yield per acre and quality of grain the crop may be called first-class. The harvesting began July 1st in the southwest and ended about August 1st in the north and northeast. There were 29,503 acres plowed up."

The November bulletin briefly summed up the condition of the crop as follows: "Fall wheat is in general reported as being of good quality, some being extra heavy."

The acreage and yield of fall wheat are given in the following table by county groups and for the Province for 1893 and 1894, together with the average for the Province for the thirteen years 1882-94:

Districts.	1894.			1893.			Yearly average for the thirteen years 1882-94.		
	Acres.	Bushels.	Bushels per acre.	Acres.	Bushels.	Bushels per acre.	Acres.	Bushels.	Bushels per acre.
Lake Erie.....	206,236	3,976,394	19.3	249,788	4,539,653	18.2	227,184	4,329,592	19.1
Lake Huron.....	108,725	2,282,983	21.4	139,483	2,691,726	19.3	141,678	2,848,459	20.1

West Midland.....	213,475	4,718,807	22.1	255,994	5,236,003	20.5	250,984	5,226,730	20.8
Lake Ontario.....	155,941	3,462,245	22.2	166,381	3,262,621	19.6	160,884	3,307,674	20.6
St. Lawrence and Ottawa...	10,785	214,217	19.9	10,361	202,233	19.5	14,739	269,447	18.3
East Midland.....	21,174	418,474	19.8	20,579	382,579	18.6	25,442	493,391	19.4
Northern Districts.....	842	14,248	16.9	634	14,212	22.4	598	11,929	19.9
Totals.....	778,992	16,512,106	21.2	913,954	17,545,248	19.2	899,071	18,087,861	20.1

The acreage of fall wheat is 778,992, being 134,962 less than in the preceding year. The decline has occurred in the western half of the Province and in the Lake Ontario counties, but in the three groups known as the St. Lawrence and Ottawa, East Midland and Northern Districts there has been a slight increase in the area given to this cereal. The average yield per acre for the province is 21.2 bushels, which is two bushels more than in the previous year, and 1.1 bushel above the average for the thirteen years, 1882-94. The Georgian Bay group has the heaviest average yield per acre, while the Northern Districts have the lightest.

THE NEW FALL WHEAT CROP. The November bulletin had the following regarding the growing of fall wheat: As to acreage, very few report an increase; most correspondents give a decrease from 5 to 50 per cent. The acreage is probably from 10 to 20 per cent. less than last year. The sowing began September 1st and was finished October 1st, the larger portion being put in the ground from September 5th to 15th. The ground was in fine condition, the only drawback being that there was too little moisture. At the time of reporting the general statement was that it never was in better condition. Little or no injury of any kind was reported. The varieties are too numerous to be referred to here.

SPRING WHEAT.

This crop was thus referred to in the June bulletin: "As usual, there is but little spring wheat in the western part of the Province, while in the eastern half the acreage is declining. The low lying lands have suffered severely, but the higher lands have fair crops. The grain was sown in fine condition, and is now recovering rapidly from the extra rain. In many places correspondents state that the rain did more good than harm. In the eastern counties about one-third of the spring wheat is either destroyed or is in poor condition; two-thirds may be said to be fair to good. Less than usual has been sown in the northern districts. On the whole present indications are for a crop about two-thirds of the average."

In the August bulletin the following summary appeared : " Reports are quite varied as to spring wheat. The little that is grown in the western half has suffered very severely from drouth, whereas excessive rains in the east have in some cases done much damage and encouraged rust. Taking the Province over, the crop may be set down as being limited in quantity and light in weight."

The November bulletin spoke of spring wheat as " light in weight and shrunk in many districts."

The acreage and yield of spring wheat are given by county groups and for the Province in the following table :

Districts.	1894.			1893.			Yearly average for the thirteen years 1882-94.		
	Acres.	Bushels.	Bushels per acre.	Acres.	Bushels.	Bushels per acre.	Acres.	Bushels.	Bushels per acre.
Lake Erie.....	2,137	27,758	13.0	2,874	32,961	11.5	10,964	157,044	14.3
Lake Huron.....	7,811	117,135	15.0	15,750	184,261	11.7	32,624	463,418	14.2
Georgian Bay	22,427	356,566	15.9	37,079	463,488	12.5	66,058	963,917	14.6
West Midland.....	25,027	443,349	17.7	47,483	628,928	13.2	72,838	1,102,099	15.1
Lake Ontario.....	58,689	811,698	13.8	97,155	974,453	10.0	154,482	2,384,018	15.4
St. Lawrence and Ottawa.....	80,160	1,121,869	14.0	99,322	1,306,802	13.2	113,833	1,857,291	16.3
East Midland	28,591	417,895	14.6	50,394	489,191	9.7	69,718	980,087	14.1
Northern Districts.....	5,174	71,584	13.8	6,664	105,979	15.9	8,215	143,995	17.5
Totals	230,016	3,367,854	14.6	356,721	4,186,063	11.7	528,732	8,051,869	15.2

There has been a falling off of over one-third in the acreage of the Province compared with the figures of the previous year, a decrease having been experienced in every group, the Lake Huron district showing a shrinkage of over fifty per cent. The average yield per acre is 14.6 bushels, which, though better than the unusually low return of 1893, is .6 bushel below the average for the thirteen years, 1882-94. The total yield of the Province is only 3,367,854 bushels, compared with an average of 8,051,869 for the thirteen years.

BARLEY.

In describing the condition of barley the June bulletin said : " In the Lake Erie district only a moderate quantity has been sown, and the condition is under the average. It has suffered from rain and also from frost. In the Lake Huron district barley is not in so good a form as spring wheat ; it is backward and a little yellow in places, but is now improving. In the Georgian Bay district rain and frost did some injury, but an improvement has taken place since warm weather returned. In the West Midland district the crop is reported as being uneven or patchy and backward. In the Lake Ontario district the condition is a little under the average. In the St. Lawrence and Ottawa district the condition is reported as more favorable, and with good weather a fair crop will be obtained. In the East Midland district the crop is fair. In the northern districts nothing of any consequence is reported. On the whole it may be concluded that the barley has suffered quite extensively, is backward in growth, but at present is making very rapid progress, and with a continuance of favorable weather will probably come up to nearly the average of the last two years."

Reports made on August 15th were thus summarized in the bulletin issued in that month : " The acreage is greater than in 1893, but the yield per acre is below the average. The excessive drouth in the west has caused premature ripening, with grain small and light, but of good bright color. In the east more favorable returns are being had, but even there the yield will be moderate. In a few places an extra good crop has been

harvested. On the whole there will be available only a limited quantity of plump, bright barley for export. The yield is practically all of the six-rowed variety."

"Barley is of good color, but inclined to be under weight," was the summary in the November bulletin regarding this crop.

The table following presents the acreage and yield of barley by county groups and for the Province :

Districts.	1894.			1893.			Yearly average for the thirteen years 1882-94.		
	Acres.	Bushels.	Bushels per acre.	Acres.	Bushels.	Bushels per acre.	Acres.	Bushels.	Bushels per acre.
Lake Erie.....	27,957	641,790	23.0	28,717	571,362	19.9	36,223	873,395	24.1
Lake Huron.....	42,135	1,084,853	25.7	37,484	804,671	21.5	55,393	1,457,149	26.3
Georgian Bay.....	45,679	1,116,049	24.4	39,740	938,610	23.5	50,378	1,279,263	25.4
West Midland.....	101,861	2,554,599	25.1	97,555	2,258,329	23.1	124,343	3,461,793	27.8
Lake Ontario.....	165,944	3,358,043	20.2	173,853	3,509,588	20.2	260,036	6,616,373	25.4
St. Lawrence and Ottawa.....	53,925	1,154,284	21.4	47,319	929,778	19.6	83,649	1,998,191	23.9
East Midland.....	45,571	1,007,421	22.1	39,520	780,790	19.5	71,318	1,691,615	23.7
Northern Districts.....	3,189	63,365	19.9	3,127	67,960	21.7	2,141	49,476	23.1
Totals.....	486,261	10,980,404	22.6	467,315	9,806,088	21.0	683,481	17,427,255	25.5

An increase in acreage is seen in six of the districts, while the Lake Erie and Lake Ontario groups fail to equal their respective areas of the previous year. There are now 486,261 acres given to barley, which is 18,946 acres more than in 1893, although still far behind the average for the thirteen years. The average yield per acre for the Province is 22.6 bushels, which, while an improvement over that of the preceding year is 2.9 bushels less than the average of the thirteen years. Nearly one-third of the barley of the Province is raised in the Lake Ontario group.

OATS.

The following appeared in the April bulletin: "The reports from every section of the Province are practically the same, and to the following effect: The rains drowned out the crop on low lying fields: on higher lands, and these under-drained, little or no damage was done. At the time of reporting the crop was making a very rapid growth, and becoming somewhat rank in straw. A few fields were baked by the hot sun, but on the whole the prospects were most promising, the only unfavorable report being as to the low lands. The crop is on the whole somewhat more backward than usual, but present conditions point to a yield fully up to the average."

The August bulletin alluded to the oat crop as follows: "Coming next to hay in acreage, this crop is about evenly distributed over Ontario. From all parts come reports of only a fair yield per acre. The eastern crop is somewhat better than the western. The grain is a little light. While some damage has resulted from rust and excessive early rains on low lands, the greatest drawback has been from drouth. Destruction by grasshoppers is very commonly reported in the west and north. The great increase in acreage is noteworthy."

November reports characterized oats as variable, and on the whole under the average in quality.

The following table gives the acreage and yield of oats by county groups and for the Province :

Districts.	1894.			1893.			Yearly average for the thirteen years, 1882-94.		
	Acres.	Bushels.	Bushels per acre.	Acres.	Bushels.	Bushels per acre.	Acres.	Bushels.	Bushels per acre.
Lake Erie	214,818	6,538,690	30.4	179,977	5,057,594	28.1	172,172	5,891,462	34.2
Lake Huron	267,272	9,052,022	33.9	220,695	6,957,246	31.5	194,553	6,810,525	35.0
Georgian Bay	246,197	7,972,815	32.4	201,443	6,426,031	31.9	168,514	5,602,937	33.2
West Midland	515,901	16,469,019	31.9	407,537	13,715,732	33.7	364,976	13,548,463	37.1
Lake Ontario	408,356	11,848,974	29.0	335,086	10,323,411	30.8	304,543	10,768,205	35.4
St. Lawrence & Ottawa	462,089	12,024,850	26.0	415,368	11,137,164	26.8	397,872	12,604,429	31.7
East Midland	181,745	5,036,720	27.7	144,986	4,025,484	27.8	125,445	3,876,392	30.9
Northern Districts.....	34,388	924,626	26.8	31,552	941,867	29.9	22,665	691,269	30.5
Totals.....	2,330,766	69,867,716	30.0	1,936,644	58,584,529	30.3	1,750,840	59,793,563	34.2

A marked increase in the area devoted to oats is noticed in every group, the total acreage now being 2,330,766, an enlargement of 394,122 acres compared with the preceding year. The average yield per acre is on the light side, being only 30 bushels, or 4.2 bushels below the average for the thirteen years. Whilst the largest acreage in barley in 1893 was credited to the St. Lawrence and Ottawa district, the West Midland group now takes the lead in this respect.

RYE.

The area of winter rye is inconsiderable, taking the Province over, but here and there in the central and eastern counties some stout advocates of this crop are to be found. What little is grown came through the winter in fair condition, although injured in places by ice.

June reports were to the effect that rye had been favorably affected by the continued rains, and was then in good condition, having made a very heavy growth.

The August bulletin said regarding rye: "Much of this crop was used for early pasture or cut for soiling. The little that was left for grain has turned out very well." November reports were to a similar effect.

The acreage and yield of rye by county groups and for the Province are shown in the following table :

Districts.	1894.			1893.			Yearly average for the thirteen years, 1882-94.		
	Acres.	Bushels.	Bushels per acre.	Acres.	Bushels.	Bushels per acre.	Acres.	Bushels.	Bushels per acre.

Although the total acreage is small compared with the area given to other cereals, it would seem from the table that rye is more popular than in 1893, although it has not regained its acreage of a few years ago, and fails to equal the average for the thirteen years. The Northern Districts are the only group showing a decrease in acreage compared with the previous year. Fully one-third of the crop is grown in the Lake Ontario counties. The yield per acre, while better than that of last year, is not up to the average.

PEAS.

The pea crop is an important one in every district of Ontario and appears to be still growing in favor. The June bulletin had the following to say regarding it: "The continued rains did more damage to this crop than to the other spring-sown crops. Early-sown peas have done well on high lands, but on low lands have suffered heavily. The rains retarded sowing so that a large acreage has been put in late. As a consequence the yield will be a little short in quantity, but at present the quality of the crop is in general all that could be desired. The reports from the largest pea counties of the west are quite favorable."

August returns were not so encouraging. The reference to peas in the bulletin published that month ran as follows: "This crop has suffered the most severely of the spring-sown staple field crops. From the eastern counties the reports are of a very contradictory nature. In some sections the early sown have done well, the late sown poorly. In other sections the reverse is the case. No damage is reported by 'bugs' from the east. In the west the severe drouth and the extraordinary prevalence of the 'bugs' have greatly reduced the prospects of this crop. On the whole the yield of first-class peas will probably be less than for some years past."

The November bulletin said: "Peas are very 'buggy' all through the western counties. Some say, 'more bugs than peas,' and the quality therefore is not so good as was expected."

The following table presents the acreage and yield of peas by county groups and for the Province:

Districts.	1894.			1893.			Yearly average for the thirteen years, 1882-94.		
	Acres.	Bushels.	Bushels per acre.	Acres.	Bushels.	Bushels per acre.	Acres.	Bushels.	Bushels per acre.
Lake Erie.....	54,167	736,015	13.6	56,849	855,479	15.0	60,730	1,076,183	17.7
Lake Huron.....	100,684	1,980,791	19.7	86,220	1,869,537	21.7	85,145	1,868,354	21.9

West Midland.....	144,212	2,605,706	18.1	137,858	2,638,971	19.1	139,589	2,920,376	20.9
Lake Ontario.....	218,749	3,632,341	16.6	206,953	3,947,510	19.1	166,551	3,289,657	19.8
St. Lawrence and Ottawa.....	76,637	1,311,846	17.5	78,736	1,316,929	16.7	90,375	1,739,323	19.2
East Midland.....	66,845	1,237,970	18.5	65,239	1,178,502	18.1	54,892	1,058,192	19.3
Northern Districts.....	17,514	352,675	20.1	14,582	340,896	23.4	10,497	239,065	22.8
Totals.....	785,007	14,022,888	17.9	738,741	14,168,955	19.2	691,392	13,982,527	20.2

There is an increase of 46,266 acres in the area of peas, but a decrease of 1.3 bushel in the average yield per acre, compared with the preceding year, the result being that the total yield is practically the same for both years, being a trifle over fourteen million bushels. The average yields per acre of both 1893 and 1894, however, fail to reach the average of the Province for the thirteen years 1882-94. The largest acreages of peas are found in the Lake Ontario and West Midland groups. The best average yield for all the periods of the table is found in the Northern Districts.

CORN.

The condition of this crop, the area of which is rapidly increasing both for purposes of husking and fodder, was thus described in the June bulletin: "In the southwest a considerable quantity had been planted before the rain came, and much of it had to be replanted. The crop over the province is backward, growth being checked by cool weather. The condition at present is hardly up to the average. The late start may interfere with the maturing of the southern ensilage varieties. Many report the young crop as not looking very thrifty. From all parts of the Province come reports of replanting, of late planting and of slow growth. Prospects are for a crop a little under the average in quantity."

The August bulletin, after referring to the growing importance of the crop in the statement that "more references than usual are made to corn by correspondents, which leads to the inference that the crop is becoming a more general one," went on to say that "reports from the great corn-growing counties of Essex and Kent are to the effect that much replanting had to be done owing to wet weather, and that the prolonged drouth has been telling on the plant. Several correspondents in that section look for only a half yield, although others are more hopeful should the remainder of the season be favorable. From other sections of the Province come complaints of late planting, and a fear that the ears may not fully ripen. Some encouraging reports have been received from different localities in Eastern Ontario, but much will depend upon the weather of the next few weeks. In Middlesex and Perth the corn was attacked by grasshoppers, but no general injury by insects has been reported."

The November reports regarding this crop were thus condensed in the bulletin issued that month: "The corn suffered very severely from the drouth, and growth during the summer was slow, but after September 1st the recovery was rapid and most marked. As a result of the peculiar weather the crop has varied greatly in different sections, in some places very good, in some short in stalks and small in ears, in others almost a failure. On the whole it is somewhat under the average."

The acreage and yield of both classes of corn are shown by county groups and for the Province in the following table:

Districts.		For husking.			For silo and fodder.			Total area.		
		Acres.	Bushels (in the ear).	Bushels per acre.	Acres.	Tons.	Tons per acre.	1894 acres.	1893 acres.	Average 1882-94 acres.

	1893	217,294	14,072,961	64.8	95,865	1,049,521	10.95			

While the area of corn averages 224,886 acres for the thirteen years, the figures for 1894 have risen to 378,709 acres, which is an increase of 65,550 acres over the area

returned for 1893. This increase has been chiefly in husking corn, although 15,496 acres have been added to the area in corn for the silo and fodder. The average yields for both classes of corn fall below their respective records of the previous year. The figures given in the three columns of total area show that corn is rapidly increasing in favor in every district in the Province.

REMARKS OF CORRESPONDENTS.

Plympton, Lambton: There is only one silo in this locality. Western corn is preferred, but Canadian corn is also put in.

Wawanosh E., Huron: A few have been adopting ensilage, but it is an experiment yet in this locality. Brant, Bruce: Several in this district have grown corn for the silo. Others haul it in and cut it as they use it through the winter.

Brant, Bruce: There are only a few silos in the township. Corn is the only crop used for ensilage. It was in a good state at cutting. It is grown in drills, and cultivated the same as a root crop.

Westminster, Middlesex: Several near here built silos last year and filled them. This year some are leaving them empty, as they think the corn is just as good in its natural state.

Zorra E., Oxford: There are twenty or thirty silos in this township. All are filled with corn—mostly White Flint and Pride of the North.

Downie, Perth: Corn in the silo appears to do very well here. The varieties grown are chiefly Early Butler, Huron Dent, M.S.S., Rival Thoroughbred, sown in rows, three feet apart, and a quarter to a half bushel to the acre. Cut for the silo in the last two weeks of September. The fault this year has been that the corn was apparently too far advanced.

Peel, Wellington: A few farmers have silos. Corn is the principal crop grown for them. Those having silos speak well of them.

Graham, Lincoln: There are but one or two silos in this township; consequently there is not much corn grown for the silo.

Glanford, Wentworth: Ensilage has been adopted this year. Corn is the principal crop; it was pretty well matured.

Esquering, Halton: The silo is getting quite common in the eastern part of the township. Corn sown in rows about three feet apart is used for making ensilage. Mammoth Southern is mostly used.

Toronto Gore, Peel: The silo is not gaining in numbers here. There is only one in our neighborhood, and it has not been a success.

Mara, Ontario: Silos have been built this year, and corn grown for them. The crop was a light one, and a great deal of it had to be fed green to keep up the supply of milk during the summer.

Storrington, Frontenac: The silo has been generally adopted by the best dairymen. Corn was generally grown and was a good crop. We plant the corn in rows three and a half feet apart, and three or four grains to the foot in row.

Lansdowne Front, Leeds: Ensilage has been adopted to a small extent only. The variety of corn chiefly grown is Southern Sweet, which yields fairly well. The heaviest crops of corn have been grown when planted in rows and cultivated.

Cornwall, Stormont: There are a few silos, but as a general thing they are not used by farmers yet.

Kenyon, Glengarry: Some use the silo, but many more feed the corn dry.

Cumberland, Russell: I have this year commenced with the silo. I am afraid we sowed rather thick. We sowed in drills, also some broadcast and some in hills. It grew about twelve feet high, but was not in a glazed stage when cut.

Osgoode, Carleton: Ensilage is in its infancy, but I never saw anything growing so fast. Five years ago about one-quarter of an acre of corn was about as much as any man would sow, but now it is from two to ten acres. Corn is the only thing put into the silo. The corn was cut for the silo about the middle of September. It is generally sown in rows from two and a half to three feet apart, and from three to six inches in the rows.

Drummond, Lanark: Some silos have been built this year. Corn is the principal crop grown for ensilage. Early sown corn was in the glazed condition when cut.

Otonabee, Peterborough: Some silos have been built, but not many. The corn was sown in drills three feet apart and about seven inches apart in the row.

BUCKWHEAT.

The November bulletin stated that the buckwheat was hardly up to the crop of 1893, but was fair. It suffered chiefly from drouth.

The following table gives the acreage and yield of buckwheat by county groups and for the Province :

Districts.	1894.			1893.			Yearly average for the thirteen years 1882-94.		
	Acres.	Bushels.	Bushels per acre.	Acres.	Bushels.	Bushels per acre.	Acres.	Bushels.	Bushels per acre.
Lake Erie	19,084	304,791	16.0	14,317	235,098	16.4	11,861	215,253	18.1
Lake Huron	1,302	22,752	17.5	3,034	47,510	15.7	1,464	26,222	17.9
Georgian Bay	5,316	99,478	18.7	4,385	71,483	16.3	1,615	28,910	17.9
West Midland	4,535	88,735	19.6	2,586	49,981	19.3	2,661	48,645	18.3
Lake Ontario	62,467	1,107,160	17.7	58,016	1,041,737	18.0	27,164	536,199	19.7
St. Lawrence and Ottawa	34,858	613,915	17.6	32,841	620,095	18.9	30,055	618,748	20.6
East Midland	16,950	283,860	16.7	17,683	296,927	16.8	8,846	170,927	19.3
Northern Districts	756	13,644	18.0	966	17,625	18.2	680	14,712	21.6
Totals	145,268	2,534,335	17.4	133,828	2,380,456	17.8	84,346	1,659,616	19.7

There is a decrease in the acreage of buckwheat in the Lake Huron group, the East Midland counties and the Northern Districts, but the other five groups have enlarged their areas, the net result being an increase of 11,440 acres in the total for the province. The average yield per acre is only 17.4 bushels, which is .4 bushels less than in 1893, and 2.3 bushels below the average for 1882-94.

BEANS.

June returns were thus summarized : "Early planted beans, especially in gardens, were cut off by late frosts. Most of the crop has been put in late. The acreage will, therefore, probably be below the average. While many report that the crop is now coming on well, the general opinion is that the early frosts and the lateness of planting will cause a diminished yield for this year."

The August bulletin, based upon reports of correspondents made on the 15th of that month, said regarding beans : "This field crop was stated to be in a critical condition at the time of reporting. If rain falls a fair crop may be harvested ; if the drouth continues there will be but a very limited crop."

Reports sent in in November were to the effect that beans had done better than was expected earlier in the season, notwithstanding the drouth.

The following table presents the acreage and yield of beans by county groups and for the Province :

Districts.	1894.			1893.			Yearly average for the thirteen years 1882-94.		
	Acres.	Bushels.	Bushels per acre.	Acres.	Bushels.	Bushels per acre.	Acres.	Bushels.	Bushels per acre.
Lake Erie	44,214	579,196	13.1	38,586	502,261	13.0	22,230	354,617	16.0
Lake Huron	2,285	36,221	15.9	1,203	16,577	13.8	806	13,663	17.0
Georgian Bay	938	14,200	15.1	622	10,695	17.2	332	5,620	16.9
West Midland	1,717	31,512	18.4	1,386	17,869	12.9	1,211	19,661	16.2
Lake Ontario	5,646	94,306	16.7	2,275	35,979	15.8	2,408	42,765	17.8
St. Lawrence and Ottawa	3,185	53,977	16.9	3,764	66,926	17.8	3,290	67,932	20.6
East Midland	1,203	16,372	13.6	835	10,889	13.0	656	11,017	16.8
Northern Districts	93	1,730	18.6	187	3,114	16.7	97	1,777	18.3
Totals	59,281	827,514	14.0	48,858	664,310	13.6	31,030	517,052	16.7

Of the 59,281 acres occupied by beans, 44,214 are in the Lake Erie counties. The average yield per acre for this great bean-growing group is this year only 13.1 bushels per acre, but in the Northern Districts the figures are 18.6. The average yield for the province is 14 bushels per acre, which, while a little better than in 1893 is 2.7 bushels poorer than the average for the thirteen years.

FIELD ROOTS.

According to the April bulletin the season was not then far enough advanced to report upon roots, as sowing was later than usual. The August reports were to the effect that roots as a rule were thin, backward and generally unpromising in the west, owing to the drouth. References to roots in November returns were rather more encouraging.

POTATOES. Early planted potatoes were much injured by frosts, and large quantities rotted in low lands. Correspondents writing on June 15th reported that late planted potatoes were then coming on well. The "bug" was not then more numerous than usual. The August bulletin contained the following: "Heavy rains at the time of planting, June frosts, bugs and drouth have combined to make the yield of potatoes small in western Ontario, both as regards the size of the tubers and quantity per acre. Some correspondents report only half a crop. In the eastern portion of the Province the reports are much more favorable, in some localities the yield being most encouraging."

The latest reports, received in November, were to the following effect: "The yield of potatoes will be considerably below the average, chiefly owing to the drouth, although many correspondents in the counties east of Peel and along the St. Lawrence speak of a good return. As a rule the tubers are small in size, but frequent references are made to their 'mealy' quality, and there is comparatively little rot. The weather was favorable for pitting and housing, which work was generally completed when correspondents wrote."

The table following gives the acreage and yield of potatoes by county groups and for the Province:

Districts.	1894.			1893.			Yearly average for the thirteen years 1882-94.		
	Acres.	Bushels.	Bushels per acre.	Acres.	Bushels.	Bushels per acre.	Acres.	Bushels.	Bushels per acre.
Lake Erie.....	19,102	1,415,558	74.1	15,314	1,291,317	84.3	16,056	1,594,596	99.3
Lake Huron.....	12,493	1,204,512	96.4	10,616	872,322	82.2	12,572	1,399,920	111.4
Georgian Bay.....	15,519	1,567,959	101.0	13,245	1,294,104	97.7	13,885	1,703,370	122.7
West Midland.....	29,294	3,243,581	110.7	24,209	2,450,410	101.2	26,546	3,079,802	116.0
Lake Ontario.....	36,110	3,398,835	94.1	29,718	2,910,774	97.9	31,813	3,470,736	109.1
St. Lawrence and Ottawa	37,784	4,549,269	120.4	34,875	2,559,359	73.4	38,290	4,569,526	119.3
East Midland.....	12,636	1,240,731	98.2	10,955	1,112,785	101.6	12,168	1,451,179	119.3
Northern Districts.....	4,315	542,747	125.8	3,669	420,141	114.5	3,289	482,485	146.7
Totals.....	167,253	17,163,130	102.6	142,601	12,911,212	90.5	154,619	17,751,614	114.8

In every district an increase is to be observed in the acreage of potatoes. The total area is 167,253 acres, which shows a marked improvement compared with the acreage for the previous year, and is well ahead of the average for 1882-94. The average yield per acre this year is 102.6 bushels, which falls 12.2 bushels below the average for the thirteen years, although 12.1 bushels above the poor average yield of 1893. The Northern Districts, as usual, give the best average yield per acre, and this year the St. Lawrence and Ottawa counties come second.

MANGEL-WURZELS. The crop was hardly as promising as usual in the west when correspondents wrote in the middle of August, although much more encouraging reports came from the eastern portion of the Province. The crop was but little affected by grasshoppers or other insect pests. The November reports were to the effect that mangels did not suffer so much from the drouth as turnips, and made a good deal of late growth. The yield in some quarters was very fair.

The following table gives the acreage and yield of mangel-wurzels by county groups and for the Province:

Districts.	1894.			1893.			Yearly average for the thirteen years 1882-94.

Lake Ontario.....	6,535	2,629,221	402	5,056	2,071,992	410	5,302	2,340,172	441
St. Lawrence and Ottawa ..	2,862	1,044,897	365	1,655	574,493	347	1,864	702,934	377
East Midland.....	2,207	851,150	386	1,704	593,193	348	1,461	600,694	411
Northern Districts.....	146	54,050	370	104	40,132	386	89	26,601	299
Totals	27,670	11,532,127	417	21,519	8,582,568	399	20,514	8,911,240	434

The table shows that mangels are growing more in favor in every district. An increase of 6,151 bushels in the acreage, and an advance of 18 bushels in the average yield per acre, lifts the total yield from 8,582,568 bushels in 1893 to 11,532,127 bushels in the present year. The average yield of the Province, however, fails to equal that for the thirteen years by 17 bushels. In the West Midland group of counties there were nearly four million bushels of mangel-wurzels grown.

CARROTS. Like mangels, this crop was much more promising in the east than in the west, and was not so badly affected by insects as were turnips. According to the November returns carrots were set back by the drouth, but revived considerably with timely rains in September. Where well cultivated the crop will be much better than was expected in August.

The acreage and yield of carrots are presented in the following table by county groups and for the Province:

Districts.	1894.			1893.			Yearly average for the thirteen years 1882-94.		
	Acres.	Bushels.	Bushels per acre.	Acres.	Bushels.	Bushels per acre.	Acres.	Bushels.	Bushels per acre.
Lake Erie.....	1,032	347,166	336	650	223,119	343	759	226,979	299
Lake Huron.....	1,051	377,833	359	1,066	333,677	313	998	353,075	354
Georgian Bay.....	1,120	388,724	347	827	277,344	335	1,075	390,889	364
West Midland.....	2,254	752,999	334	1,769	607,953	344	2,160	800,469	371
Lake Ontario.....	2,014	683,754	340	1,716	560,924	327	2,572	956,806	372
St. Lawrence and Ottawa ..	2,290	706,768	309	1,913	572,751	299	1,734	547,625	316
East Midland.....	1,121	372,326	332	1,013	307,763	304	869	294,807	339
Northern Districts.....	304	86,570	285	334	87,919	263	191	53,075	278
Totals	11,186	3,716,140	332	9,288	2,971,450	320	10,358	3,623,725	350

There has been an increase both in the acreage and yield of carrots, the result being a total return of 3,716,140 bushels for the Province, an increase of 744,690 bushels compared with the total yield of the previous year. The average yield per acre for the Province, however, is 18 bushels less than the average for the thirteen years, 1882-94. The largest acreage of carrots is found in the St. Lawrence and Ottawa group, although the greatest total yield (as also in 1893), is seen in the West Midland district.

TURNIPS. When correspondents wrote about the middle of August, the prospects for turnips were not encouraging, more especially in the western half of the province. They were rather late in being sown, owing to rainy weather, and a drouth ensuing they were inclined to be rather small. In some of the western counties grasshoppers attacked turnip fields and did much injury, some fields in the northeastern portion of the county of Huron being eaten almost bare. From the county of York east to the Ottawa river turnips, where grown, were in better condition, as the drouth was not so prevalent in that part of the province, and the grasshoppers also were in much less numbers. The November bulletin had the following to say regarding this crop: "Turnips have suffered from various causes. Early in the season the drouth was trying to the crop, and in many counties, but more especially in Huron, Grey and Perth, much injury was done by grasshoppers, some correspondents reporting that fields of turnips had been almost completely ruined by them. With the fall rains the crop revived to an encouraging extent and the growing season of October was most favorable to improvement. In York and some counties further east turnips gave a fair return, but, generally speaking, it has been an off year for this class of roots. Some were leaving their turnips in the ground at the time of reporting."

The following table shows by county groups and for the Province the average yield and acreage of turnips for 1893 and 1894, together with the average for the Province for the thirteen years, 1882-94:

Districts.	1894.			1893.			Yearly average for the thirteen years 1882-94.		
	Acres.	Bushels.	Bushels per acre.	Acres.	Bushels.	Bushels per acre.	Acres.	Bushels.	Bushels per acre.
Lake Erie	3,918	1,447,707	369	3,112	1,174,532	377	2,497	895,075	358
Lake Huron	17,200	7,067,427	411	16,976	6,145,398	362	13,732	5,658,181	412
Georgian Bay	19,231	8,692,223	452	18,483	6,704,713	363	13,838	5,814,004	420
West Midland	46,713	19,636,079	420	43,729	19,350,245	443	37,043	15,956,496	431
Lake Ontario	40,841	17,526,107	429	37,702	17,479,700	464	31,922	13,846,802	434
St. Lawrence and Ottawa...	6,960	2,532,097	364	5,656	2,060,989	364	4,575	1,642,930	359
East Midland	10,080	3,887,690	386	8,734	3,390,877	388	6,650	2,514,551	378
Northern Districts	2,714	905,157	334	2,212	668,901	302	2,306	750,752	320
Totals	147,657	61,694,487	418	136,604	56,975,355	417	112,563	47,078,791	418

A most striking feature of the table is the closeness of the figures of the average yield per acre for the three periods given, the average yield in the present year being 418 bushels, which is identical with that for the thirteen years, 1882-94, and only one bushel above the average for 1893. There is an increase of 11,053 acres in the area of turnips in the Province compared with the previous year, and this gain has been sustained in every group.

HAY AND CLOVER.

It will be seen from the following paragraph from the April bulletin that clover did not present a very encouraging appearance in the spring: "The reports concerning this crop are not favorable. A few correspondents speak of good fields and encouraging pros-

pects on high and well drained lands, but east and west there has been a great deal of "heaving," more particularly during the spring, and even a liberal application of the land-roller cannot fully remedy matters. Old meadows have suffered most in this respect, and the newer fields are rather patchy and thin owing to the drouth which prevailed last season. A few correspondents allude to the injurious effects still traceable from the visitation of grasshoppers last summer. At present the chances appear to be rather against a good yield of hay and clover this year, although timely rains may make up for past drawbacks."

The June bulletin said: "A small amount of timothy was winter killed, but the principal damage has resulted from some cold, wet days of spring and early summer. The reports from all counties are in agreement that we shall have a short hay crop this year. Old meadows are thin and backward; new meadows are only in fair condition. The rapid growth now being made will not be sufficient to bring the crop up to the average. The prospects are for a crop of about two-thirds that of 1893. The crop is late—a month late in some sections. In some places it is heading out on short growth. There is no need to differentiate counties or districts, as all report the same, namely, a light crop. The heavy crop of last year may be responsible in part for the light growth of this year." The bulletin continued, referring to clover: "This crop has suffered more than timothy. Complaints of winter-killing are universal. The old fields are very patchy and uneven; the new fields are coming on in fair condition. A few report the crop as excellent, but the majority report a short and uneven crop of red clover. Alsike, now in bloom, is showing up well. On the whole the clover crop promises to be below the average. Damage by insects is reported from a few counties."

Speaking of the hay crop the August bulletin stated: "The larger portion of the present crop is timothy and native grasses. There is less clover than usual in the first cutting. On the whole the quality is reported very good, as good harvesting weather prevailed over all parts except in a few eastern sections."

The latest reports, as rendered in the November bulletin, ran: "Red clover suffered much from winter-killing. The drouth affected it as much as most other crops, causing a short crop. Owing to lack of fodder, much red clover was pastured that would otherwise have been allowed to form seed. The crop of clover seed, as a consequence, is short this year in all parts. The midge was reported destructive by very few correspondents. Alsike has turned out much better; it may be set down as being very good. The yield of seed is reported as varying all the way from two to five bushels per acre."

The acreage and yield of hay and clover are given in the following table by county groups and for the Provinces:

Districts.	1894.			1893.			Yearly average for the thirteen years 1882-94.		
	Acres.	Tons.	Tons per acre.	Acres.	Tons.	Tons per acre.	Acres.	Tons.	Tons per acre.
Lake Erie	291,617	424,437	1.46	323,977	573,361	1.77	281,442	415,997	1.43
Lake Huron	280,003	350,372	1.25	311,186	537,185	1.73	250,258	355,214	1.42
Georgian Bay	217,721	271,807	1.25	242,862	409,014	1.68	202,073	271,721	1.31
West Midland	437,232	614,425	1.41	459,649	923,021	2.01	419,120	659,964	1.57
Lake Ontario	429,146	643,611	1.50	479,037	846,867	1.77	418,435	607,076	1.45
St. Lawrence & Ottawa	672,247	965,013	1.44	684,993	1,221,776	1.78	583,543	806,067	1.38
East Midland	178,813	211,677	1.18	193,587	331,345	1.71	162,200	200,994	1.24
Northern Districts. .	70,164	93,858	1.34	71,603	120,988	1.69	49,402	63,807	1.29
Totals	2,576,943	3,575,200	1.39	2,766,894	4,963,557	1.79	2,366,473	3,380,840	1.43

The total area in hay and clover is 2,576,943 acres, which is a decline of 189,951 compared with the acreage of the previous year. Every district has participated in this decrease. The average yield per acre for the Province is 1.39 ton, which falls below the average yield of the previous year, and also below the average for the thirteen years.

COMPARATIVE YIELD OF FIELD CROPS.

AGGREGATE YIELD OF FIELD CROPS. In the table following the total yield of field crops named is given for each of the past five years, together with the average for the thirteen years, 1882-94:

Field crops.	1894.	1893.	1892.	1891.	1890.	1882-94.
	bushels.	bushels.	bushels.	bushels.	bushels.	bushels.
Fall wheat	16,512,106	17,545,248	20,492,497	21,872,488	14,267,383	18,087,861
Spring wheat.....	3,367,854	4,186,063	8,290,395	10,711,538	7,683,905	8,051,869
Barley	10,980,404	9,806,088	12,274,318	16,141,904	15,600,169	17,427,255
Oats	69,867,716	58,584,529	64,758,053	75,009,542	52,768,207	59,793,563
Rye	1,886,606	994,771	1,132,504	1,134,630	1,563,345	1,565,076
Peas	14,022,888	14,168,955	14,494,430	18,323,459	15,389,313	13,982,527
Buckwheat	2,534,335	2,380,456	2,521,214	2,608,142	2,053,720	1,659,616
Beans	827,514	664,310	535,931	769,600	761,341	517,052
Potatoes	17,163,130	12,911,212	12,239,817	24,055,886	17,561,117	17,751,614
Mangel-wurzels.....	11,532,127	8,582,568	10,350,474	11,779,448	11,594,518	8,911,240
Carrots	3,716,140	2,971,450	3,827,361	3,814,016	4,210,542	3,623,725
Turnips	61,694,487	56,975,355	63,541,641	68,853,452	47,040,563	47,078,791
Corn for husking	16,275,352	14,072,961	11,229,498			
	tons.	tons.	tons.	tons.	tons.	tons.
Corn for fodder.....	1,049,765	1,049,524	948,907			
Hay and clover.....	3,575,200	4,963,557	4,384,838	2,392,798	4,305,815	3,380,840

It must be borne in mind in studying this table that both acreage and yield go to make up the result. Fall wheat, spring wheat, peas, and hay and clover fail to reach their respective figures of 1893, while fall wheat, spring wheat, barley, rye and potatoes show a falling off compared with their respective figures for the thirteen year period. The greatest relative decrease in yield is noticed in the items of spring wheat and barley.

AVERAGE YIELDS PER ACRE. The following table gives the average yield of each of the staple crops by county groups for 1894, and for the Province for both 1893 and 1894, as well as the average for the thirteen years 1882-94, except in the case of corn, which has been divided into two classes for only three years:

Field crops.	Lake Erie.	Lake Huron.	Georgian Bay.	West Midland.	Lake Ontario.	St. Lawrence and Ottawa.	East Midland.	Northern Districts.	The Province.		
									1894.	1893.	1882-94.
	bush.	bush.	bush.	bush.	bush.	bush.	bush.	bush.	bush.	bush.	bush.
Fall wheat	19.3	21.4	22.3	22.1	22.2	19.9	19.8	16.9	21.2	19.2	20.1
Spring wheat.....	13.0	15.0	15.9	17.7	13.8	14.0	14.6	13.8	14.6	11.7	15.2
Barley	23.0	25.7	24.4	25.1	20.2	21.4	22.1	19.9	22.6	21.0	25.5
Oats	30.4	33.9	32.4	31.9	29.0	26.0	27.7	26.8	30.0	30.3	34.2
Rye	15.0	19.6	15.2	18.0	14.5	16.0	15.5	16.5	15.4	14.5	16.0
Peas	13.6	19.7	20.1	18.1	16.6	17.5	18.5	20.1	17.9	19.2	20.2
Buckwheat	16.0	17.5	18.7	19.6	17.7	17.6	16.7	18.0	17.4	17.8	19.7
Beans	13.1	15.9	15.1	18.4	16.8	16.9	13.6	18.6	14.0	13.6	16.7
Potatoes	74.1	96.4	101.0	110.7	94.1	120.4	98.2	125.8	102.6	90.5	114.8
Mangel-wurzels	421	458	404	434	402	365	386	370	417	399	434
Carrots	336	359	347	334	340	309	333	285	332	320	350
Turnips	369	411	452	420	429	364	386	334	418	417	418
Corn for husking	61.3	63.6	55.3	66.7	51.3	64.6	49.6	43.6	60.9	64.8
	tons.	tons.	tons.	tons.	tons.	tons.	tons.	tons.	tons.	tons.	tons.
Corn for fodder	6.55	8.08	10.26	9.71	9.83	10.39	8.40	7.54	9.43	10.95
Hay and clover	1.46	1.25	1.25	1.41	1.50	1.44	1.18	1.34	1.39	1.79	1.43

Fall wheat is the only field crop giving a larger average yield per acre than for the thirteen year period, while the same figures are given for turnips for 1894 as for 1882-94. The best average yields are found in the following groups: Lake Huron, barley, oats, rye, mangel-wurzels and carrots; Georgian Bay, fall wheat and turnips; West Midland, spring wheat, buckwheat and husking corn; Lake Ontario, hay and clover; St. Lawrence and Ottawa, fodder corn; Northern Districts, beans and potatoes. Peas reach the highest figures in both the Georgian Bay group and the Northern Districts.

RATIOS OF AGGREGATE CROPS. The following table gives the ratio of yield of each crop by county groups and for the Province, 100 representing the average of the Province for the thirteen years, 1882-94:

Districts.	Fall wheat.	Spring wheat.	Barley.	Oats.	Rye.	Peas.	Buckwheat.	Beans.	Potatoes.	Mangel-wurzels.	Carrots.	Turnips.	Hay and clover.
Lake Erie	92	18	73	111	111	68	142	163	89	130	153	162	102
Lake Huron	80	25	74	133	131	106	87	265	86	158	107	125	99
Georgian Bay	89	37	87	142	134	119	344	253	92	114	99	150	100
West Midland	90	40	74	122	149	89	182	160	105	126	94	123	93
Lake Ontario	105	34	51	110	109	110	206	221	98	112	71	127	106
St. Lawrence and Ottawa ..	80	60	58	95	58	77	99	79	100	149	129	154	120
East Midland	85	43	60	130	73	117	166	149	85	142	126	155	105
Northern Districts	119	50	123	134	32	148	93	97	112	203	163	121	147
The Province	91	42	63	117	89	100	153	160	97	129	103	131	106

The results given in this table are influenced by both acreage and yield. Mangels and turnips are the only crops going above 100 in every district, while spring wheat fails to reach 100 in any group. The highest average for the Province is made by beans, the figures being 160, but the ratio of spring wheat touches as low as 42; and while five items fall below 100, seven go above that figure, and one exactly touches the standard.

RATIOS OF YIELD PER ACRE. The next table compares the average yield per acre in 1894 with that of the thirteen years, 1882-94, the latter being represented by 100:

Districts.	Fall wheat.	Spring wheat.	Barley.	Oats.	Rye.	Peas.	Buckwheat.	Beans.	Potatoes.	Mangel-wurzels.	Carrots.	Turnips.	Hay and clover.
Lake Erie	101	91	95	89	97	77	88	82	75	104	112	103	99
Lake Huron	106	106	98	97	111	90	98	94	87	102	101	100	88
Georgian Bay	108	109	96	98	88	94	104	89	82	96	95	108	93
West Midland	106	117	90	86	108	87	107	114	95	96	90	97	90
Lake Ontario	108	90	80	82	99	84	90	94	86	91	91	99	103
St. Lawrence and Ottawa ..	109	86	90	82	91	91	85	82	101	97	98	101	104
East Midland	102	104	93	90	100	96	87	81	82	94	98	102	95
Northern Districts	85	79	86	88	86	88	83	102	86	124	103	102	104
The Province	105	96	89	88	96	89	88	84	89	96	95	100	97

Taking the figures for the Province, fall wheat goes 105 and turnips just reach 100, while the other crops fall below the standard. In one group only does fall wheat fail to mark as high as 100; but barley, oats and peas do not rise to that figure in any district.

FRUIT AND FRUIT TREES.

Up to the time reports were sent in for the April bulletin, there had been but little actual growth in field and forest. In fact, at the close of the second week in April vegetation appeared to be but little ahead of what it was two or three weeks earlier. A good spring rain was hoped for by correspondents, as something that would start growth and bring the season well forward.

Under date of June 15th the bulletin for that month thus reported regarding fruit: "The frost has done some damage to fruit. Grape vines have suffered quite extensively in the West Midland, Lake Huron and Georgian Bay counties. Peach trees were injured to some extent by frost, and "leaf curl" is reported by many. There is promise of only a fair crop. Apples are setting well, and on the whole promise a good crop, especially east of Toronto. Pears are in good form. Plums and cherries are reported fair. Small fruits give prospect of extra yield. Strawberries are reported as turning out fairly well. The Essex and Kent and Niagara districts give on the whole very favorable reports as to fruit."

The August bulletin contained the following regarding orchards: "Correspondents are not unanimous regarding the various fruits, but the general condition may be thus summarized: Apples, notwithstanding the profusion of blossoms, will not be a heavy crop. Fall and winter apples are dropping off in large numbers, and the earlier sorts are only moderate in yield. There is much scab reported, and "worms" have been plentiful. Plums are in fair condition in the Niagara district where they get special attention, but other sections report much injury from curculio. Pears will give a fair yield taking the Province over, although considerable blight is reported in the west. Peaches are fair to good, early sorts especially yielding largely. Cherries were plentiful on the tree, but were unusually wormy. Black knot is doing great damage to this fruit. Grapes will hardly be up to their average owing to early summer frosts, although in some sections there is promise of an abundant yield. The rose-bug has been doing damage to some vineyards. Small fruits have been fair, except wild sorts, which have suffered from drouth. In fact, rain and cold weather at the season of blossoming and fertilization, and drouth during midsummer, have hindered the orchards from fulfilling early expectations."

The returns made in November were thus summarized in the bulletin published in that month: "The supply of marketable apples is not as large as that of the average year, except in some of the Bay of Quinte and St. Lawrence counties, although there is more than enough for home supply in most sections. Large quantities of apples were blown down before ripening, and much of what remained was spotted and wormy. Pears, although not free from blight in a few local sections, have yielded well, and the peach crop has also been large and on the whole satisfactory. Where the curculio was destroyed or prevented, plums gave good returns, but the ravages of the black knot amongst both plum and cherry trees is referred to by correspondents in tones of regret. Reference to grapes are less than usual, but vineyards appear to be in good condition, and so also are fruit trees except in the cases cited above. Several correspondents speak well of the effects of applying Paris green, kerosene emulsion and the Bordeaux mixture. Our fruit growers are becoming more alert to the importance of both preventive and remedial methods."

REMARKS OF CORRESPONDENTS.

Gosfield S., Essex: Apple worm very bad on trees not sprayed.

Gosfield S., Essex: There have been a few local tests of spraying apple trees. Where they have been sprayed three or four times at intervals the results have been almost marvellous—large, fine, clean, almost perfect fruit. Packers from Huron county say the best they have ever handled. On orchards near by not sprayed there have been but few apples gathered, and these hardly worth the name, being little, gnarled, wormy and scabby.

Sombra, Lambton: People are finding that it pays to spray.

Ashfield, Huron: Insect pests, notwithstanding the application of the Bordeaux mixture, have done immense harm to orchards this season.

Stanley, Huron: A good many speak of spraying the fruit trees next spring.

Glenelg, Grey : Regarding fruit, I would say that this part of the country will yet be a good fruit district, at least for apples. Some large orchards are being planted at the present time. The present orchards are small, and have too many varieties, of which the greater part are summer and fall sorts. We want larger orchards of a few of the leading varieties of winter apples. If these are carefully attended to, and sprayed for fungus and insect pests, we can grow apples in quality and quantity equal to anything in Ontario.

Sarawak, Grey : Farmers are going more into cheese, butter and hogs, and I think on the whole they are a little better than in 1893, although not much, as the prices of cattle, sheep and hogs are so low, and we cannot give horses away. We must go into fruit raising and practise spraying. This is a fine fruit region ; 50,000 barrels of apples will go from Owen Sound station this fall.

Lobo, Middlesex : We are yet troubled with the codling moth and scab ; still, I think spraying the trees has effected some good.

Guelph, Wellington : Spraying is not common, but it is becoming more so. I believe it to be a benefit.

Glanford, Wentworth : Where spraying was done there were very few worms, but where not sprayed there is scarcely a sound apple.

Pickering, Ontario : There has been great need of spraying this year.

Laxton, Victoria : Trees have been badly affected by the bark louse and are not looking as thrifty as they might be if sprayed in time and attended to as they should be.

In the following table the area in orchard and garden (in rural municipalities only) is given by county groups and for the Province, together with the ratio per 1,000 acres cleared in 1894 :

Year.	Lake Erie.	Lake Huron.	Georgian Bay.	West Midland.	Lake Ontario.	St. Lawrence and Ottawa.	East Midland.	Northern Districts.	The Province.
	acres.	acres.	acres.	acres.	acres.	acres.	acres.	acres.	acres.
1894.....	41,727	23,401	13,001	38,731	58,123	12,481	10,440	1,064	198,968
1893.....	42,114	22,433	13,278	39,293	58,715	13,156	8,962	1,109	199,060
1892.....	42,412	22,815	12,351	38,598	56,275	11,686	9,416	545	194,098
1891.....	40,802	22,167	11,858	37,704	53,267	12,011	9,130	893	187,832
1890.....	39,517	21,600	11,858	37,338	52,438	11,098	8,330	617	182,796
Rate per 1,000 acres cleared in 1894.....	27.6	16.5	11.6	16.2	24.7	5.2	11.7	5.7	16.2

The rural area in orchard and garden is estimated at 198,968 acres, which is 92 acres less than the figures for the preceding year. The Lake Ontario group has the largest area in orchard and garden, the Lake Erie coming next ; but when it comes to the rate per 1,000 acres cleared the positions are reversed. The best relative gain in the acreage of orchard and garden is to be seen in the figures for the East Midland group.

FARM SUPPLIES IN THE SPRING.

The following summary regarding the condition of supplies appeared in the April bulletin : " There is not much unanimity of opinion regarding the quantity of hay, grain or fat and store cattle on hand. In the three western districts of the Province the bulk of correspondents report a surplus of hay and wheat, and in some counties there are more oats than are needed for feeding and seeding. In the Lake Ontario counties there is but little hay to spare, and in the eastern and northern groups hay and oats and wheat are in store in only moderate quantities. A great deal of hay was pressed and exported during the fall and winter, and large quantities of wheat were fed to live stock—more especially to swine. Fat cattle are hardly as plentiful as usual, and buyers appear to be shy in most quarters, for several correspondents state that fewer beeves than usual have been sold for May shipment. Store cattle are plentiful with some farmers and scarce with their neighbors ; in fact the cattle industry appears to be in a rather unsettled condition, except in the case of fresh cows, which are in better demand than ever for the dairy."

FALL PLOWING.

In Essex and Kent comparatively little plowing had been done as correspondents wrote in November, corn and fruit demanding the more immediate attention of farmers. Taking the Province generally, however, the work was well advanced, although on clay land the dry weather made plowing more difficult than usual. Judging by the remarks of several correspondents, there will be more land left in pasture for dairy purposes than in former years.

THRESHING AND MARKETING.

Threshing was not far advanced in the East Midland counties as correspondents wrote, but in nearly every other portion of the Province the work was either completed or nearly finished. Wheat was being marketed but slowly, owing to low prices, but an immense quantity of both wheat and barley is being fed to live stock, more especially to hogs. Oats and peas have been sold in considerable quantities. Growers of grain generally are far from hopeful, judging by the tone of the returns.

FARM IMPROVEMENTS.

While a large number of correspondents, both east and west, state that the hard times prevent much expenditure for farm improvement, there appears to be a considerable advance in the way of underdraining, more especially in the western counties, where tile has been plentiful. Farmers, however, do not appear to have much confidence in ditching machines, and nearly all the work has been done by hand. In the way of buildings, work has been mostly in the direction of improved barns, a number of old ones being raised and good stone stables, etc., built underneath. The greatest activity has been in the way of fence improvement. The old "zig-zag" rail fences are rapidly giving way to some form of straight fence, made more or less of wire or picket. In Perth and Huron a considerable number of honey locust hedges have been planted.

MISCELLANEOUS.

The April bulletin contained the following miscellaneous notes: "The large amount of plowing done in March was commented upon by many correspondents. A good seed bed for spring grain was reported by all who alluded to the matter. Bees had an early flight, the warm and sunny days of March proving very inviting. A disease of the feet in cattle, supposed to be caused by eating ergot, was referred to by a couple of correspondents in Grey. It was purely local, however. Owing to the slight snowfall since January, but little local lumbering was done. The allusions to the cheese factories and creameries were many and favorable, and the farmers also appear to be turning more attention towards poultry raising."

STATISTICS OF
THE WEATHER AND THE CROPS.

THE WEATHER.

TABLE I. Showing for each month the highest, lowest, mean highest, mean lowest and mean temperature at the principal stations in Ontario in 1894; also the annual mean for each station.

GENERAL REMARKS OF CORRESPONDENTS.

FROM THE APRIL REPORTS.

Gosfield N., Essex: Most of our best farmers are putting in considerable tile drains, and with fine results. One man told me a few days ago that he wished his farm was drained all over with tile drains four rods apart. He said his clover and fall wheat were all right where the land was drained, but were badly killed out where there were no drains.

Orford, Kent: There seems to be a growing disposition among farmers of this section to keep a few colonies of bees for family use.

Raleigh, Kent: The value of tile drainage was never shown to better advantage than at the present time in this neighborhood. Land that could seldom be got into crop before the middle of May on account of water, is now (a month earlier) covered with a most promising crop of fall wheat. Other lands so drained were sown with barley and other spring grains by the 20th of March, while fields along side will not be in good order for at least a week of fine weather.

Southwold, Elgin: It has been customary at most of the farmers' meetings during the last few years for the theoretical farmers to denounce the old-fashioned system of summer fallowing for the culture of fall wheat, arguing that bare fallows injure the soil. I think if some of the theorists were to drive through this section of the country, and see the difference between the wheat fields that have been properly fallowed and those that were sown after a crop, they would change their opinion.

Yarmouth, Elgin: Some farmers have held their wheat for two or three years for a rise in price. The grain has become musty, and they are now feeding it as chop to cattle, hogs and sheep.

Bertie, Welland: Artificial manures do not pay, and barnyard manure and clover are our only available or visible means of recuperation, and even if we husband these on most economic principles the fertility of the soil will gradually deteriorate. As for myself, I draw immense quantities of stable manure from Buffalo, which is an expensive way of keeping up food supply for growing crops. At present low rate of farm crops there is little or no money in it, but the satisfaction of raising better crops is somewhat pleasing to a farmer of an agricultural turn of mind.

Plympton, Lambton: There is more underdraining and more and better machinery. The latter will necessitate a heavier class of horses, and there is a growing desire to change to better methods. We have a farmers' club in this locality, meeting monthly. Very few attend it, but the minutes published in our county papers are eagerly read by farmers, which shows a desire to be better informed in the theory and practice of agriculture.

Sombra, Lambton: The Farmers' Institute, being cheap, finds much favor, and the literature sent out is doing an immense amount of good, not only for the present but in its influence for the future, in cultivating a sense of the benefit of reliable farm literature, close study and experimental enterprise.

Brant, Bruce: I may mention one change in reference to manure. The old pernicious practice of hauling the manure into large heaps in the fields is almost abandoned for the much better one of immediately spreading it when taken from the stable or yard—whether rotted or not. I believe that decomposition should take place in the soil. That has been our practice for a number of years, and with very beneficial results.

Greenock, Bruce: So far as any change of system goes I may say that most farmers are yet working largely on the old lines. Perhaps hog raising has increased and sheep gone back some, as also the growing of wheat. Fall or skim plowing is more practised than in past years, which helps to diminish the product of the weed crop. Stock feeding and better care of manure has to some extent helped to keep farmers out of the clutches of the money lender and sheriff during these hard times.

Sunnidale, Simcoe: There is considerable change in agricultural methods. Wheat raising is declining very fast on account of not doing very well and the low price prevailing, and farmers are going more into growing coarse grains and clover seed, and into stock raising.

Nissouri E., Middlesex: There is not the same area under wheat there used to be, and dairying and hog raising is the rage. People are getting all the cows on hand they can keep.

Zorra E., Oxford: The most noticeable change in feeding is the large quantity of wheat which has been used as feed during the past winter. It would be safe to say that 100 bushels has been fed to hogs and cattle on almost every 100 acre farm in the vicinity.

Matilda, Dundas: The abolition of ridges and furrows in order to make fields level for the reaper and binder, without other provision for taking off the water, resulted in serious loss in many parts of the township during the past few years. We think the necessity of providing for the discharge of the water is becoming better understood, and that the loss from this source will be much less in future.

Winchester, Dundas: The necessity of better drainage is becoming more and more apparent, and many are putting it into practice. Farmers generally are taking more pains to house and feed their stock, and more grain is fed than in years past. A good many have silos and find them very beneficial.

Drummond, Lanark: There is a great improvement in the feeding and handling of stock. I think the Government never spent money to better advantage than in the establishing of Government farms and in the distribution of bulletins and other agricultural literature, as well as in sending out lecturers to farmers' institutes and other gatherings of agriculturists. I consider that the advice given me through these means is worth at the least \$200.

Chandos, Peterborough: Nothing will pay in this locality like good sheep, good cows and a cheese factory. The people have come to their senses at last and have built a cheese factory, by which means they will enrich the land by pasturing and returning the manure to the land, which is its proper place.

Providence Bay, Manitoulin : The Travelling Dairy did good work on the Island last season, and has undoubtedly improved the dairy industry. Prices of butter have been higher during the winter and spring than ever before in the district, and there has been a better demand, with prices accordingly, for dairy cattle. Improved methods of breeding are not as yet put into practice here. Some few grow fodder corn, but we have no such thing as a silo up to the present time. A considerable number of fruit trees are planted every year, but too many apple trees are lost, owing undoubtedly to a want of drainage and general care. Some first-rate apples are grown here—inferior to none—but the demand is greater than the home supply.

FROM THE JUNE REPORTS.

Malden, Essex : I am pleased to be able to say that tile draining is becoming quite general about here, and good results have followed.

Harwich, Kent : Farmers are beginning to see the great advantage of underdraining, and are using more or less tile, which pays well for the outlay. Many of our farmers, however, are too careless in allowing so many foul weeds to mature seed and pollute the farms. I believe the law regarding the propagation of foul weeds should be made more strict.

Raleigh, Kent : On our leading roads the old snake fence will soon be a thing of the past. The bulletins from the Ontario Agricultural College are having a good effect in many cases.

Sombra, Lambton : The Farmers' Institute is attracting favorable support in spite of a scarcity of "quarters." The literature is welcomed, and is doing a real and permanent good in arousing attention.

Ashfield, Huron : The raising of hogs, sheep and cattle is now regarded as more remunerative than growing grain for market ; hence the system of farming has much changed of late. I find your bulletins and reports of much value.

Greenock, Bruce : If farmers would co-operate in growing and threshing clover, and grow rape for fall forage, I feel certain the dip in the wheat market would not be so much felt.

Dorchester N., Middlesex : If agricultural societies would give a prize for plowing and other farm work to young men and boys, as was common half a century ago, I think it would be better for the country generally than speeding horses around a ring, which seems to be the *summum bonum* of young men's desires at present, and is encouraged by the directors of agricultural societies. What originally was intended to be a stimulus to agriculture is now to a very large extent turned into a circus. Who among farmers or mechanics want their daughters to go up in balloons, or their boys to walk upon wires?

Nissouri E., Oxford : Flax is grown to some considerable extent in this township. The land is rented by the owners of the mills at about \$10 per acre.

Zorra E., Oxford : A number of farmers are planting honey locust hedges, several miles being set out.

Ellice, Perth : Flax has been sold to a considerable extent around the village of Sebringville this year, and it looks well so far.

Nichol, Wellington : Large quantities of flax have been sown. Many farmers have as much as ten acres. The low price of grain and live stock have caused farmers to try something else.

Peel, Wellington : Flax is grown here by quite a number of farmers. The land is well adapted to its production, and it succeeds well in favorable seasons, averaging close on two tons of fibre per acre. We have several flax mills within easy reach, and the price paid per ton is from \$10 to \$12. Rape also does well, and is grown in considerable quantities for cattle and sheep pasture.

Haldimand, Northumberland : Every year I am more convinced of the necessity of underdraining. I have one field in which the wettest half was underdrained ; now it is much the drier half, and never has any standing water.

Storrington, Frontenac : Great quantities of fodder corn are planted in this township. As we are nearly all engaged in dairying, and we find that we require green feed to tide us over the dry time in August, almost everyone plants a piece of green corn for green feed. Silos are becoming numerous, and large quantities of corn are being grown for filling them. If it was not for the dairy business we would have pretty hard times ; but as it is the farmers here are generally prosperous.

Rainy River District : Hops are plentiful here, growing wild in the woods in fine condition, and fully equal to tame ones.

FROM THE AUGUST REPORTS.

Vespra, Simcoe : This locality was threatened with a plague of grasshoppers early in the season. They hatched out in immense numbers early in May, but were checked by the long spell of wet, cool weather, and later were attacked by parasites, so that now no trouble is feared from them this season. Another very noticeable feature this year is the amount of fodder corn grown by farmers, who are beginning to appreciate the value of this great fodder plant.

Wallace, Perth : Horn flies are troublesome, but not so bad as last summer.

FROM THE NOVEMBER REPORTS.

Colchester S., Essex : The past season will remain in our memory as the driest summer in a life time, although the crops appeared to retain their vigor wonderfully, when we remember that very little rain to speak of fell from the 27th of June to the 5th of September. Fields of corn in light soil dried at the tops, and some trees withered and died. The berry fields looked as if burned. The apple crop looked very promising until the rains came and then most of the fruit fell off.

Pelee Island, Essex : A number of persons have grown sweet potatoes this year, and where the ground was kept clean and mellow they have done fairly well. Some years they do splendidly, growing to four and five pounds each in weight. A goodly number grew sorghum. My son has a mill and has been busy making syrup. So far he has made over 2,000 gallons. Both yield and quality are poor this year, as the weather was too dry.

Raleigh, Kent : Small patches of sorghum are grown on many farms for family use. A great improvement in its manufacture will have to take place before it becomes very popular. I believe this to be a fit subject for experiment at some of the experimental farms.

Sombra, Lambton : Alsike clover is the most profitable crop grown here, as our soil seems adapted to it. Wherever it grows rank there is less seed and the roots die ; but wherever the growth is short, as was generally the case this year from drouth, more seed matures and the roots do not die out. One field has produced three good crops of seed the past three years, but it affords very little pasture in the summer and fall. Alsike makes a very good mixture with timothy for hay, and fall wheat generally does well after it.

Goderich, Huron : We found the grasshoppers very numerous, and with such dry weather they ate up nearly everything that was green. Black crickets were also very thick ; in spots the ground was almost black with them. They ate a lot of the upper part of carrot roots and so cut off the tops of a great many, and made holes in turnips nearly to the centre.

McKillop, Huron : Flax is grown in considerable quantities. In some cases the owner of the flax mill rents good, clean land at \$10 per acre from the farmer, doing all the work of preparing the land and properly cultivating it. The owner of the mill also finds the seed and generally sows it, the farmer harrowing it and rolling it, and the mill owner pulling it and drawing it away. In other cases the farmer purchases the seed, sows it himself, pulls and delivers it at the flax mill and receives \$10 per ton for good, clean, well-saved flax, delivered in good order at the flax mill. It used to be \$12 a ton, and a good yield would be from two to three tons to the acre, and it generally yields about fifteen bushels of seed to the acre in a good season.

Wawanosh W., Huron : I think the Province of Ontario has as intelligent and industrious an agricultural population as can be found anywhere. But when we find that with all their time, their talents, their skill and experience, and the unremitting attention applied to their calling, they at the present time are barely paying their way, there must be something radically wrong. A successful farmer ought to command as much by way of remuneration for his labor and skill, as those in any other class or calling. This may be socialism, but it is to my mind only fair. If we are compelled to sell our products openly in the markets of the world, surely we should be accorded a like privilege in making the purchase of our necessities. Our governments, also, should in some way control transportation lines in the interests of the producers of the wealth of this country, which has been favored with such unlimited resources, and which requires a fostering and economical government to control its destinies.

Glenelg, Grey : I would like to add that there are too many farmers hereabouts who do not grow roots to supplement their winter fodder, and these are the very men who refuse to be reached by the Farmers' Institute or anything else of an enlightening nature.

Innisfil, Simcoe : A few in this section have a new kind of oats called the "Wonderful," which I do not see mentioned in the Agricultural College list. They ripen about the same time as fall wheat, weigh 41 lb. to the measured bushel, and turn out 40 bushels to the acre.

Ekfrid, Middlesex : You will find that I have given the carrot crop an average of 500 bushels an acre, but I have some on my own farm which have yielded 1,100 bushels to the acre. The variety is named the Mammoth White or Beith carrot. The crop, though not grown for show purposes, is, I think, the finest I have ever seen. The carrots are very large, with scarcely a small one amongst them, and they are of excellent quality.

Nissouri E., Oxford : The farmer's condition at present is rather unfavorable ; but while we all see that fact, it is more or less difficult to suggest a remedy. Keeping more live stock would help us, as we want more manure, and that of a better class and better cared for. I hope you will not think me boasting when I state a few facts about my own farm. It has all been taken out of the solid bush by us in the last twenty-eight years, and was so low and flat that anyone who thought of settling upon it was counted unwise. It is now cleared, drained and fairly well built upon. I have, as a rule, fed all the rough grain it grew, and for that reason have again been counted foolish, because extravagant. But for the last few years our farm has been attracting notice. Last year our oats were at least one-third above the average, and this year my neighbor's oats were nearly ruined by grasshoppers, while mine, just across the fence, went 70 bushels to the acre. What the reason is I do not know unless it be the vigor of the plants. My turnips last year were not hurt with lice, while others were much hurt. This year there are very few turnips left to my neighbors by the grasshoppers, but mine will go 700 bushels or more to the acre. I believe that if a crop, a tree, a beast or a man is kept in a vigorous condition, it will be better able to withstand the attack of any prevalent disease. The moral is : Keep the land rich, and one hundred to one it will pay. Manure makes money.

Zorra E., Oxford : In this locality the latest improved machinery is being used quite generally, such self-binders, pea harvesters, rack lifts and slings in barns for unloading.

Downie, Perth : The tendency at present seems to be towards more intensive farming, with a view towards retrenchment and economy, and more attention is being given to dairying and raising hogs. The desire which prevailed a few years ago to increase the acreage of the farm, is now giving place to the opposite, viz., to make more from the land already in possession. I think everything points towards smaller farms. The silo and rape culture, with rye, lucerne, etc., for fodder, means more fertility and better returns from a smaller acreage.

Nichol, Wellington : A great many fields of rape are sown and used for fall feed for lambs and young cattle. The sowing of a few acres of flax is becoming more general. There is a scutching mill here which means a close market with a good and sure profit. I would also note the fact that a large number of young men (and older ones) are moving into the towns and cities.

Nichol, Wellington : The farming industry is in a very bad condition at present, as farm products in general command such a low price. Feeding beef for the English market was a great industry, but that has so deteriorated, owing to the low prices and other causes, that it will not be done to any extent this winter. Hence, those who used to raise stockers can only get a little over half the price they used to get but a short time ago. In fact there is little demand for them. The feeders can't buy them and make it pay, and the raisers cannot hold them.

Amaranth, Dufferin : Hogs are selling well, but are coming down in price. If everybody raises a large number of swine the price is sure to lower. People talk about an "unlimited market" for that and the other thing, but it is all nonsense. Do they believe that the people in the old country can grow nothing, and that they can eat everything that grows on the face of the earth?

Grantham, Lincoln : I would suggest better draining and better manuring. Farmers undertake to till too much land as a general thing, and the crop does not receive sufficient attention.

Markham, York : As a general thing corn is planted too thick. Instead of being in drills it should be in hills, three feet apart each way, so that it can be cultivated both ways, which answers the double purpose of cleaning the land and developing the crop to the greatest extent. Compton's Early was found the best with us. No late varieties should be grown for ensilage, as the corn should be cut before the frosts come, and it should glaze a little before cutting.

Clarke, Durham : Rape is a very useful crop to have for pasture in the months of September, October and November, when pastures are failing. It can be sown as late as the first of August with profit, leaving the land in excellent condition for the next year's crop. I have sowed rape and oats on timothy sod after the middle of July, and have had good pasture all through the fall.

Storrington, Frontenac : The only crops out of the ordinary line are lucerne and flax. The former succeeds well here, and the flax is raised by some for the seed. Dairying is the principal vocation of farmers in this section, and if they would only take better care of their live stock in the winter and feed better, there would be no hard times.

Winchester, Dundas : There are more pains taken than formerly to work the land well in the fall, and most people are doing their best to kill foul weeds and grasses. There has never been so much corn raised for feeding dry and for the silo as in the past season. Civil engineers never before had so much to do laying out work under the Municipal Watercourses Act, and we expect grand results. Draining is what this part of the country wants. Tiling is much needed.

Mara, Ontario : In addition to the regular grain and root crops, a number of our farmers grow one or more of the following crops : rape, millet, hops, flax, onions (the market has been glutted and prices are very low), sunflowers and strawberries. We are trying nearly everything in which there is any prospect of making money, but every new enterprise soon gets overdone, and the market gets so low that there is no profit.

Kenyon, Glengarry : The manufacture of tile is needed in this section, as underdraining is much required, as has been proved during the past wet seasons. I believe the manufacture of tile at a reasonable cost would pay well here.

Hawkesbury E., Prescott : A number of farmers in this township have taken to raising flax, feeding the seed to cattle, and ignoring the fibre altogether. Some do not know how to handle the crop. I was at a farmer's place the other day where he had moved his flax and was threshing it with the flail!

St. Joseph, Algoma : I think the general condition of our farming country will compare very favorably with other parts of the Province. Grain has ceased to be grown except for the purpose of butter production, and for fattening hogs. We are all striving to excel in butter, hogs and poultry, and it is difficult to say which pays the best—possibly a combination of all three. The lecturers sent out by the Government have done much to educate people here into a better system during the last few years. There is more system and attention given now than in the grain growing days.

Lash, Rainy River District : Rape succeeds very well here, and sown on late fallows is a fine fall help for stock. We have wild hops in abundance. Flax does extra well, but there is need of a flax mill to encourage the growth thereof. This district is badly in need of a custom grist mill, centrally located.

PART II.

LIVE STOCK, THE DAIRY AND THE APIARY.

LIVE STOCK.

Taken all together the reports in the spring concerning the condition of live stock were considered satisfactory. Horses did not appear to have been as well cared for as in former years, owing to low prices; yet, though thin, they came through the winter with but little sickness, barring an occasional attack of distemper. Horned cattle as a rule were healthy, though lean; reports of diseases were very scattered. Tuberculosis was referred to by some Oxford correspondents, but the cases alluded to were not regarded as serious. Sheep were in particularly good trim, and lambing was proceeding most satisfactorily, although a few correspondents complained of an unusually large proportion of singles being dropped. Swine were regarded as in generally good condition. A little distemper was here and there reported, and "a disease resembling rheumatism" had shown itself in a few places, while in the neighborhood of Dereham township hog cholera had broken out and carried off 200 hogs; but notwithstanding these local and occasional occurrences, the swine industry seldom presented a more favorable bill of health. There was plenty of fodder with which to carry stock through the winter, taking the Province all over.

When correspondents wrote about the middle of August the most favorable reports concerning pastures came from the St. Lawrence and Ottawa counties, but even there the fields were becoming dry. In the remainder of the Province, but more particularly in the western groups, serious alarm was felt as to the extent of the drouth. Several correspondents stated that the milk flow had fallen off fully one-third. Pastures hardly deserved the name, they were so brown; and some correspondents said that the aftermath would be almost nothing unless early rains came. Grasshoppers were bad in Huron and Bruce, and in the Georgian Bay and West Midland groups, as well as in Halton and more eastern counties. The hornfly was reported in nearly every group, and had been very annoying. Notwithstanding these drawbacks live stock were reported in a healthy condition generally, although rather thin. Several correspondents referred to hand feeding, and a few spoke favorably of the benefit derived from using green corn during the drouth. The opinion was expressed that there would likely be an abundance of fodder for winter feeding should pastures pick up.

The November returns were thus summarized: "The long drouth of summer left pastures in a rather bare condition, but fall rains revived them to a wonderful extent, and live stock in general had a splendid chance to pull up. The supply of cattle was greater than the demand, and although few fat stock were offering they were in good general condition. Sheep also were in a healthy and vigorous state, but the demand for lambs was light, except at such low prices that few holders cared to sell. An immense number of hogs were sold when correspondents wrote, being disposed of chiefly on foot. No mention was made of disease among live stock, and but for low markets the season would be counted a successful one. There will be plenty of fodder, although straw is rather short. Outside of the St. Lawrence counties there has been no great increase in the number of silos, but all over the Province there has been a wider area of corn raised for cattle feeding. The horn-fly was hardly as bad as in the previous year."

REMARKS BY CORRESPONDENTS.

Malahide, Elgin : Many farmers during the last two years have gone heavily into raising cows and hogs. Dairy cows are now very high in price, but hogs have been declining in value. Mixed farming is practised here, as farmers do not think it safe to run to any special line at present.

Canborough, Haldimand : There are some changes in agricultural methods. For instance, farmers are going more into dairying and are sowing less wheat. They raise more hogs, sheep and cattle, and less horses.

Sherbrooke, Haldimand : Cattle in this township are nearly all stabled during winter, and the old custom of wintering at the straw stack is now nearly obsolete.

Dawn, Lambton : There is not much change in the method of feeding horses and cattle, but there is a great change in the method of feeding pigs. Hogs in this vicinity are now fed on ground wheat and corn. Farmers believe that wheat pays better when fed to pigs than when selling at the present price of 53 cents per bushel.

Moore, Lambton : The destruction of sheep by dogs is terrible to contemplate, dogs even entering the sheep pens and tearing the occupants to pieces. The writer had a pen of pedigree Shropshires destroyed on the night of the 14th inst., and on the 15th and 16th his neighbors had their flocks mangled and torn fearfully by dogs. The Legislature passed a stringent Act for the protection of sheep, but also enacted in the Act for the protection of game, sec. 11 : "That poisoned substances cannot be exposed in any locality where dogs may have access to the same," which completely emasculates the sheep Act, as dogs are not in the way of applying to farmers to get shot before attacking their sheep, and so poison alone can reach the night prowlers.

Ashfield, Huron : The other day I witnessed the sale of a fine, sound three-year old colt for \$30, and twelve months to pay for it.

Ashfield, Huron : Owing to the establishing of cheese and butter factories, as well as the low price of grain, more attention is paid and will continue to be paid to the feeding and raising of cattle. Millet, corn, grasses and roots are the crops which will receive attention, as the raising of such crops are necessary to return fertility to the land. "Use the crops raised on the land" is becoming the prevalent doctrine.

Wawanosh E., Huron : My own method of feeding cattle is as follows : I cut a lot of my straw and pulp all my turnips, and always mix a feed ahead, just what they will eat up clean. I feed a lot of hay during the day, but give two messes a day of mixed feed.

Dorchester N., Middlesex : I think more care is generally exercised with stock of all kinds than in years past ; the stabling is much better. Many farmers are putting good stone or concrete stables under the barns, which is certainly much better for live stock than the old plan of poor shelter or permitting them to run out all winter about the straw stack.

Dumfries S., Brant : The changes in farming seem to be in favor of dairying and the raising of hogs. But there is one thing very discouraging about the hog business, and that is the way the packers keep prices fluctuating, up one week and down the next ; but they do not allow their cured meats to jump around in price, but keep them up to the top notch.

Erin, Wellington : The present low prices of horses will give farmers a chance to open their eyes regarding horse breeding, and I venture to predict that only really first-class stallions will be patronized. This depression in the horse market will do more to rid the country of scrub stallions, and eventually of scrub horses, than any writing, talking or legislating could do. It is a perfect object lesson. Really fine carriage horses are in as good demand as ever, but in the past good stallions of this breed were not patronized as well as they should have been.

Pickering, Ontario : We are advocating creameries and cheese factories. A creamery is now building at Greenwood, and more are spoken of. There will have to be some change, as we cannot afford to raise wheat at 60 cents per bushel.

Richmond, Lennox and Addington : There is a noticeable improvement in the methods of feeding practised. Corn fodder and ensilage, though not yet as extensively used as could be wished, are certain to be more generally utilized. Hog raising during the past year has become more extensive. Sheep raising is about normal in extent, but shows progressive tendencies as regards quality.

Storrington, Frontenac : We have a good many silos in this township, and a great many dairy cows are kept. We grow a large amount of corn fodder, which helps to make other fodder plentiful.

Roxborough, Stormont : Some of our farmers are grateful for what the Government is doing in sending lecturers to our Farmers' Institutes, and we need a good deal of stimulus to waken us to our need of improving our stock, especially in procuring pure-bred males of every kind.

Hawkesbury E., Prescott : Owing to the good demand for cheese during the past years farmers are using all their energies in feeding and improving their stock. Fodder corn, either from the silo or dried, has been used all over the township. A great many young cattle of different breeds have been brought in at pretty high prices.

Laxton, Victoria : There have been some changes in feeding stock this winter, at all events. Considerable wheat has been fed on the farm, especially to poultry and pigs, because farmers could get only fifty-seven cents for sixty pounds of wheat, fifty cents for sixty pounds of peas and thirty-five cents for thirty-four pounds of oats. The general idea now is that feed must be grown for cattle, and grain growing for the market direct must be practically abandoned. A great number of farmers will grow more roots and corn for fodder. There is only one silo in this section yet. The Travelling Dairy paid us a visit last fall and woke up some farmers a little as to butter-making.

HORSES. The following table gives the number of horses by classes in 1893 and 1894, by county groups and by the Province; also the total number of horses in each district and in the Province in each of the five years 1890-94:

Horses.		Lake Erie.	Lake Huron.	Georgian Bay.	West Midland.	Lake Ontario.	St. Lawrence and Ottawa.	East Midland.	Northern Districts.	The Province.
Working horses.	{ 1894	54,655	41,218	34,972	77,637	82,585	72,251	26,948	5,420	395,686
	{ 1893	52,184	38,036	32,271	72,395	79,378	68,381	25,797	5,173	373,615
Breeding mares.	{ 1894	11,357	10,113	8,246	18,384	18,336	14,705	6,093	1,728	88,962
	{ 1893	13,129	11,638	9,355	20,563	20,774	16,594	6,895	1,605	100,553
Unbroken horses.	{ 1894	27,404	21,607	16,242	39,218	39,041	31,507	12,719	2,391	190,129
	{ 1893	30,778	24,182	18,439	42,639	41,891	35,376	15,152	2,562	211,019
Totals	{ 1894	93,416	72,938	59,460	135,239	139,962	118,463	45,760	9,539	674,777
	{ 1893	96,091	73,856	60,065	135,597	142,043	120,351	47,844	9,340	685,187
	{ 1892	96,995	74,437	59,582	135,355	142,423	122,411	48,565	9,046	688,814
	{ 1891	96,722	75,357	56,161	132,879	143,716	120,760	44,756	8,108	678,459
	{ 1890	94,235	72,218	53,697	129,641	140,571	118,959	43,801	6,514	659,636

There has been an increase of 22,671 in the number of working horses in the Province, a falling off of 11,591 in the number of breeding mares, and a decline of 20,890 in the number of unbroken horses, the net result being a decrease of 10,410 in all classes compared with the figures for the previous year. In fact there are fewer horses in the Province than in any year since 1890. The Northern Districts is the only group showing an increase in the number of horses of all classes. While the Lake Ontario counties lead in the number of all classes of horses, the West Midland group has the greatest number of breeding mares and unbroken horses.

HOGS. The appended table gives the total number of swine by county groups and for the Province for each of the five years 1890-94, and for 1893 and 1894 by classes of over and under one year:

Hogs.		Lake Erie.	Lake Huron.	Georgian Bay.	West Midland.	Lake Ontario.	St. Lawrence and Ottawa.	East Midland.	Northern Districts.	The Province.
Over 1 year..	{ 1894.	41,282	19,622	20,303	37,404	35,856	48,583	20,082	4,796	227,878
	{ 1893.	38,112	20,026	20,671	35,441	34,194	46,815	19,442	4,695	220,396
Under 1 year	{ 1894.	171,304	79,821	86,345	194,130	175,925	134,015	59,286	13,429	914,255
	{ 1893.	144,892	67,711	74,186	167,375	151,532	122,070	52,417	11,443	791,626
Totals	{ 1894.	212,536	99,443	106,648	231,534	211,781	182,598	79,368	18,225	1,142,133
	{ 1893.	183,004	87,737	94,857	203,816	185,726	168,885	71,859	16,138	1,012,022
	{ 1892.	182,353	87,878	96,312	201,400	183,399	159,715	70,737	16,180	996,974
	{ 1891.	223,384	102,295	104,600	243,343	219,485	162,088	82,864	18,257	1,156,316
	{ 1890.	242,635	107,506	95,628	239,310	210,985	156,623	75,199	12,673	1,140,559

The total number of hogs is higher than in any year of the five except 1891, both classes of swine sharing in the increase. In 1890 the Lake Erie group was first in the total number of hogs raised, but since that year the West Midland counties have taken the lead. However, there are more old swine in the St. Lawrence and Ottawa district than in any other group.

HORNED CATTLE. The following table shows by classes the number of cattle in 1893 and 1894 by county groups and by the Province, together with the total number in each of the five years 1890-94 :

Cattle.	Lake Erie.	Lake Huron.	Georgian Bay.	West Midland.	Lake Ontario.	St. Lawrence and Ottawa.	East Midland.	Northern Districts.	The Province.
Working oxen { 1894	518	358	658	255	406	664	838	1,215	4,912
{ 1893	697	353	656	312	445	553	943	1,295	5,254
Milch cows... { 1894	84,120	75,122	62,726	159,541	130,584	237,244	71,792	13,108	834,237
{ 1893	81,914	71,809	60,531	153,640	126,533	226,010	70,405	12,756	803,598
Store cattle { 1894	38,450	70,870	42,513	90,942	47,139	56,619	23,468	6,808	376,809
over 2 years. { 1893	41,234	71,485	40,578	92,311	45,282	55,936	24,561	6,627	378,014
Young and { 1894	92,523	122,363	95,432	187,675	132,638	167,355	64,916	20,441	883,343
other cattle. { 1893	94,475	121,719	92,300	186,855	127,807	163,934	64,256	19,670	871,016
Totals..... { 1894	215,611	268,713	201,329	438,413	310,767	461,882	161,014	41,572	2,099,301
{ 1893	218,320	265,366	194,065	433,118	300,067	446,433	160,165	40,348	2,057,882
{ 1892	221,512	263,057	191,654	424,747	296,462	437,172	155,096	39,440	2,029,140
{ 1891	219,609	258,341	181,514	428,760	291,471	422,091	138,842	38,167	1,978,515
{ 1890	222,626	251,736	170,775	414,259	271,991	399,478	131,905	31,942	1,894,712

The number of oxen in the Province is still decreasing, being placed at 4,912, and in some of the more settled parts of the country a yoke of working oxen is regarded as more or less of a curiosity. Store cattle are rather less than in 1893, but milch cows and young cattle have increased to such an extent as to make the total of all classes above that of the other years of the table. The Northern Districts have the most oxen, but the West Midland counties possess the most store cattle and young animals. The immense number of milch cows in the St. Lawrence and Ottawa group, however, puts that district in the lead in the matter of the total number of cattle.

SHEEP. The following table shows the number of sheep by classes in 1893 and 1894, by county groups and for the Province, and also the total number in each of the five years 1890-94.

Sheep.	Lake Erie.	Lake Huron.	Georgian Bay.	West Midland.	Lake Ontario.	St. Lawrence and Ottawa.	East Midland.	Northern Districts.	The Province.
Over 1 year .. { 1894	121,501	151,599	146,322	190,585	162,753	209,922	75,281	28,672	1,086,635
{ 1893	112,411	147,724	128,291	185,433	156,060	200,137	76,616	25,397	1,032,069
Under 1 year. { 1894	107,551	143,160	119,367	169,603	133,147	173,818	60,491	22,033	929,170
{ 1893	101,597	141,959	111,424	168,495	128,254	170,151	62,477	19,512	903,869
Totals..... { 1894	229,052	294,759	265,689	360,188	295,900	383,740	135,772	50,705	2,015,805
{ 1893	214,008	289,683	239,715	353,928	284,314	370,288	139,093	44,909	1,935,938
{ 1892	210,713	279,092	232,185	340,228	263,955	357,766	124,815	41,719	1,850,473
{ 1891	194,526	236,168	205,357	328,362	263,053	327,166	103,609	35,510	1,693,751
{ 1890	172,959	187,861	163,138	255,403	189,080	267,211	76,728	27,315	1,339,695

There is an increase in each class of sheep, the total number in the Province being 2,015,805 compared with 1,935,938 in 1893. The East Midland is the only group failing to show as many sheep of either class as in the previous year. The St. Lawrence and Ottawa counties make the best showing so far as sheep raising is concerned.

POULTRY. The keeping of poultry on the farm is regarded by correspondents from a variety of standpoints. Some claim that there is more loss than profit in fowl as ordinarily kept, as they do more injury than benefit to the growing crops, and eat more than they return. Others hold that the destruction of insects by fowl is of great benefit to agriculture, and that they can be fed largely upon scraps and poor grain that otherwise would be wasted. It is also pointed out that the product of the hennery pays the grocery bill, and that poultry also gives a much needed variety to the home table. The great abundance of grasshoppers this summer furnished turkeys with choice food, and the birds are said to be in particularly good condition on that account. With the exception of a few odd cases of cholera and roup but little disease was reported among fowl. Judging by references to the increased interest taken in poultry at the fall fairs the industry is growing in popularity. It is evident, however, that there is need for more definiteness and method so far as poultry raising on the farm is concerned.

The appended table gives by county groups and for the Province, the number of poultry (by classes) for the years 1893 and 1894, and also the total number for each of the five years 1890-94 :

Poultry.		Lake Erie.	Lake Huron.	Georgian Bay.	West Midland.	Lake Ontario.	St. Lawrence and Ottawa.	East Midland.	Northern Districts.	The Province.
Turkeys.	{ 1894 1893	86,793 85,886	62,693 58,722	51,277 52,133	131,323 106,884	143,700 132,897	158,703 154,143	44,279 36,860	10,437 11,002	689,205 638,527
Geese	{ 1894 1893	42,805 41,572	50,417 49,571	48,978 50,298	76,649 74,143	85,516 84,918	92,738 98,492	34,284 33,220	6,830 7,268	438,208 439,482
Other fowls	{ 1894 1893	899,448 793,995	712,258 656,275	551,088 519,733	1,290,686 1,243,391	1,272,201 1,170,194	1,169,549 1,143,736	420,127 410,637	109,892 98,466	6,425,249 6,036,427
Totals	{ 1894 1893 1892 1891 1890	1,029,046 921,453 893,995 921,742 893,207	825,368 764,568 776,690 785,709 778,638	651,343 622,164 623,983 603,837 584,440	1,498,649 1,424,418 1,418,000 1,407,686 1,424,388	1,501,417 1,388,009 1,360,248 1,391,488 1,350,131	1,420,990 1,396,371 1,409,098 1,307,506 1,294,763	498,690 480,717 482,721 479,147 437,637	127,159 116,736 114,233 108,975 91,660	7,552,662 7,114,436 7,078,973 7,006,090 6,854,864

There are more turkeys than in 1893, although the Georgian Bay group and the Northern Districts fail to reach their respective figures for that year. Geese are slightly less in number on account of the falling off in the Georgian Bay and St. Lawrence and Ottawa counties and the Northern Districts. Other fowls have increased in every group, and the total of all classes has been enlarged by 438,226, compared with the figures for 1893. The Lake Ontario counties lead in the number of fowls of all classes, the West Midland and St. Lawrence and Ottawa groups coming closely after.

REMARKS OF CORRESPONDENTS.

Colchester N., Essex : Poultry have been profitable. No disease has been among them to my knowledge.

Colchester S., Essex : Poultry are in good condition. The Plymouth Rock is the favorite breed here, and if properly managed are quite profitable.

Gosfield N., Essex : Large numbers of chickens are sold to hucksters, who take them to Detroit.

Gosfield S., Essex : Our fowl pay the grocery bill.

Maidstone, Essex : They are in good condition and pay well for their keep.

Camden, Kent : I believe there is more profit in hens than in any other fowl, and it is mainly through the profit on eggs.

Harwich, Kent : Fowl are in good condition, and I think they pay well for their keep and trouble.

Raleigh, Kent : Large quantities of chickens, geese and turkeys are annually raised, and mostly sold to hucksters for the Detroit market. I don't think any farmer can give either cost or profit ; it would be the wildest guess work. The only trouble I have heard of is what is here called "scaly legs."

Aldborough, Elgin : Those who look after them claim they are the best paying investment on the farm ; while others who neglect them say they are not worth the bother.

Malahide, Elgin : The poultry business is booming more than any other except hog raising, even though the price of eggs has remained low for the season. Plenty cheap wheat is being fed to fowls with some profit.

Yarmouth, Elgin : There is a large increase in the number of both chickens and turkeys raised. Farmers are feeding wheat to their poultry very largely.

Windham, Norfolk : The exhibitions show an increasing interest in poultry. Choice breeds bring fair and sometimes fancy prices. The rise in eggs has caused a reaction in chickens. The packing factory here consumes tons of these fowl. Fowl generally appear as well as I ever saw them.

Canborough, Haldimand : Poultry are in good condition, and there is a large profit in eggs and poultry. All the groceries for a family of five are got with eggs from my hens, besides the live birds sold annually.

Canborough, Haldimand : The prices for poultry and their products have been lower than in former years, still I regard poultry properly cared for as being as profitable as any stock kept on the farm, if it were only for home use.

Cayuga N., Haldimand : Cholera takes off a great many hens. I wish there was some remedy.

Dunn, Haldimand : Fowl are in good condition, but are not of much profit. As the old saying is "they generally eat their heads off"

Bertie, Welland : The poultry supply in this township is a large one, of excellent quality, and in good condition. The farmers' poultry yard pays as well as any part of his industry. Eggs average about 16 cents a dozen, and chickens about \$3 to \$4 per dozen. The market is well supplied, but not overstocked. Other fowls are not so extensively raised as the different species of hen.

Pelham, Welland : Poultry raisers think they have a very good margin in them, both in egg production and raising fowl for the market.

Stamford, Welland : Poultry are in good condition, and the profits were good this year. No diseases of any consequence molested them. The Langshan fowls are very much raised here.

Bosanquet, Lambton : I believe that fowl pay better for their board than any other stock.

Plympton, Lambton : It is the prevailing opinion that there is money in poultry. One dollar a hen is the rule, with 50 per cent. off for the feed. Personally I consider them a first-class nuisance on a farm, only so far as they keep down insects.

Sombra, Lambton : The clutches hatched this year have been rather small, and there has been unusual mortality among the young chicks and turkeys. Hens too often are kept in filthy, lousy places, and most of our flocks are mongrels. Comparatively few pay attention to producing fowl for the market. The flocks are larger in size than they used to be, but are not cared for any better. However, I think poultry are just as profitable as most that the farmer does.

Ashfield, Huron : The low prices of eggs this summer has made some farmers resolve to give up keeping hens, except a few for family use. They are considered an unprofitable investment, destructive to crops in winter and needing much care and feed in winter.

Ashfield, Huron : The profit is so small that it would take a first-class mathematician to figure it out.

Colborne, Huron : Poultry pay better than cows.

Goderich, Huron : I think poultry, if well cared for, about the best paying stock we have.

Howick, Huron : Poultry are plentiful. The surplus eggs are generally traded out in the country stores. The hens are mostly left to take care of themselves.

Stephen, Huron : I think there is no profit in poultry if kept in very large numbers. In smaller numbers, where they live largely on waste, there is no doubt that they are profitable.

Brant, Bruce : The Americans taking the duty off eggs will cause eggs to fetch a higher price. Poultry properly taken care of have been paying and will pay in the future, as well as any other stock on the farm. And while we have as many grasshoppers as we had this year turkeys cannot help being profitable.

Artemesia, Grey : The poultry industry is commanding more attention and is paying all right when properly managed, and when right breeds are kept.

Keppel, Grey : My wife keeps about 100 hens, and she says that she makes as much money out of them as she does from six cows. She also says that it pays to raise turkeys and geese for market, and that it also pays to keep a few ducks for laying, but it does not pay to raise them for market.

Sydenham, Grey : My opinion of farmers' poultry is that they eat and waste more than they are worth.

Flos, Simcoe : I keep a large number of poultry, and I think they yield more clear profit than any other product on the farm for the labor expended on them—more especially hens.

Sunnidale, Simcoe : I am of opinion that fowl pay as well as anything on the farm.

Biddulph, Middlesex : I never knew fowl to be so plentiful. The country is swarming with geese and turkeys of the finest quality. Their keep cost nothing for a considerable time, as they fed upon grasshoppers.

Biddulph, Middlesex : Poultry paid well this year, and will be likely entered into more extensively by farmers.

Dorchester N., Middlesex : The condition of poultry is all right, but there is not much profit when eggs sell at eight and ten cents per dozen. They are now selling at twelve and fourteen cents, but the hens are not laying much at this season.

Westminster, Middlesex : Turkeys are very numerous this year, but a number have a disease which swells their head. I have been told that it is roup.

Oxford E., Oxford : Poultry is plentiful and in fine condition, being liberally fed with cheap grain, and I don't know any more profitable use to make of it. It will compare favorably with its use in any other kind of stock.

Oxford W., Oxford : Farmers are paying more attention to poultry since wheat and other grain have become so low ; but the market has been low and profits light.

Zorra E., Oxford : Poultry are in good condition, having been fattened on grasshoppers and crickets. From fifty to one hundred hens are a source of profit on every farm, both on account of destroying insects and furnishing a palatable and healthful supply of food nearly the year round.

Dumfries S., Brant : Poultry are profitable to keep at the present price of grain. Wheat fed to poultry will pay 80 cents per bushel.

Downie, Perth : Poultry is recognized as a profitable auxiliary to the farm. While few make it in any sense a specialty, yet all agree that there is nothing more profitable. More attention is being given to better breeding than formerly, and more poultry will be kept than in the past. The grasshoppers were excellent for turkeys and other fowls, which makes them more profitable than usual.

Ellice, Perth : Hens have been kept at a loss all the year, except the month of October, when a small profit was got from them.

Arthur, Wellington : Hens are more profitable than cows. Sixty hens can be made to produce in one year eggs to the value of \$60, or \$1 for each hen.

Guelph, Wellington : Far too many old hens are kept, eating good feed and giving almost no return. Good breeds of poultry, when well kept, are the most profitable stock on a farm.

Minto, Wellington : Fowl are in a healthy condition generally. No one around here thinks of them any more than as a kind of necessary and convenient bird to keep around to lay a few eggs, but not to pay.

Niagara, Lincoln : Poultry are in good condition, but likely to rule low in price, other meats being cheap and plentiful. It is questionable whether it pays to keep more than consume the offal and scraps about the house and barn.

Glanford, Wentworth : There seems to be more attention given yearly to poultry, as evinced by the displays at the fall fairs. A few years ago a coop or two of ordinary barnyard fowl would represent the poultry. Now every little show has a full list for all the leading varieties, and the prizes are well contested.

Saltfleet, Wentworth : A well kept hennery will yield \$1 per hen clear profit annually.

Saltfleet, Wentworth : Poultry are in good physical condition, but are unprofitable. It does not pay to keep more than are required for your own use.

Trafalgar, Halton : I have taken much interest in poultry this season, and I am persuaded that no stock on the farm has yielded so much profit as the hen. Chickens have been a good price all the season, and eggs yield a profit with wheat at fifty or sixty cents a bushel, if they are properly cared for.

Chinguacousy, Peel : We do not propose to keep poultry for profit. I think what we make off them pays for their keep, and we get what we use ourselves for our trouble. That is the way with the general run of farmers. Some people say there is a lot of money in fowl keeping. Perhaps there is, but not many people know how to make it out of them.

King, York : Farmers are going into poultry more extensively on account of the profit. I suppose there are double the number of fowl kept now that there was two years ago.

Markham, York : Fowl are not paying so well as last year. There are some cases of roup.

Whitby, Ontario : I do not think there is any profit in raising poultry. Geese and ducks will eat ten times as much as they will sell for, and eggs and chickens have been so low that they don't pay.

Clarke, Durham : At the present price of grain it pays, I think, to keep laying fowls. However, I have never kept an accurate account of profit or loss on poultry. They roam over the farm at will until winter.

Darlington, Durham : Poultry are in good condition, but we think they have not been as profitable as they were some years back.

Manvers, Durham : From all that I can learn there is but small profit in keeping poultry for egg production.

Mara, Ontario : There was not much profit on eggs at eight cents a dozen, which was the prevailing price during the summer. They are a good price just now—fifteen cents—but only a few hens are laying.

Sophiasburg, Prince Edward : Poultry have not paid as well as before the McKinley Bill came into effect. They may pay better under the revised tariff.

Amherst Island, Lennox and Addington : Poultry are not raised as extensively here as they are near large cities, but from what we do raise here we believe we receive as large a profit according to the capital invested as we can from cows.

Camden, Lennox and Addington: Farmers in general keep no account of fowl, showing profit or loss of egg production over feed. We do not know how much we feed; neither do we know what we sell and make therefrom.

Kingston, Frontenac: It has been a very favorable year for all kinds of fowl, and there is a large supply of both birds and eggs. It is one of the most profitable parts of farm work, and for that reason nearly all the farmers are keeping large quantities of fowl, and when fed with cheap wheat the business is profitable.

Storrington, Frontenac: Those who keep poultry in the right way derive as much profit from the food consumed as from that fed to any other kind of stock. Large quantities of turkeys and geese are raised here.

Bastard, Leeds: Most of the farmers keep a few hens. They let them run and scratch for a living, get what eggs the hens do not succeed in hiding, and what is not wanted for family use is "swapped" at the store. On the whole I think every ten cents worth of eggs costs the farmer fifteen cents.

Roxborough, Stormont: Poultry give good satisfaction, and pay well. Those who provide comfortable winter quarters have more profit from their outlay than from anything else.

Kenyon, Glengarry: Their condition is good, but I consider the profits very small considering the price of fowl and eggs. They about eat their heads off.

Hawkesbury E., Prescott: More attention is paid to poultry keeping in this township than formerly. I see everywhere better poultry houses, and I suppose the profits will keep pace with the attention paid to them.

Cumberland, Russell: For large fowl it was not a good year. Small fowl did well, but we have hawks and foxes to contend against. In the face of these drawbacks, however, there is money to be made out of the industry.

Laxton, Victoria: There are profits from poultry if given proper attention. As stated by a neighbor, fifty hens are worth two cows as far as profits are concerned.

Dysart, Haliburton: Poultry are in good condition. If the time spent in attending to poultry is charged at the rate of five cents an hour, then they are a loss. The prospect of an increased price of eggs is leading to an extra number being kept through the winter.

Lutterworth, Haliburton: Not one man in a hundred can tell you anything about the profits on fowl. They are kept on the farm as a matter of course.

Williamsburg, Dundas: The old women hereabouts have been terribly cross in consequence of the low price of poultry, and many farmers sold the most of the hens alive early in the summer to go to the Montreal market. The poet says: "None but the brave deserve the fair;" and I can tell you it took a brave man to live with some of them.

Sidney, Hastings: Eggs kept down to 10 cents a dozen until later in the season than usual. Poultry is cheap on the market now. They are all sold by the piece and not by the pound as they ought to be. Chickens are from 30 to 50 a pair; geese from 50 to 65 cents, and turkeys from 60 cents to a dollar and up.

Morrison, Muskoka: Poultry, except for home use, is not in favor. In fact, when they have to be fed as they ought the low prices either for eggs or carcase is not found profitable.

WOOL CLIP. The table following shows the number of fleeces, with total and average weights, by county groups and for the Province for 1893 and 1894, and also the average of the Province for the thirteen years 1882-94:

Districts.	1894.			1893.			1882-94.		
	Fleeces.	Pounds.	lb per fleece.	Fleeces.	Pounds.	lb per fleece.	Fleeces.	Pounds.	lb per fleece.
Lake Erie.....	121,042	692,270	5.72	108,539	631,633	5.82	107,776	607,703	5.64
Lake Huron.....	152,404	892,773	5.86	144,463	854,167	5.91	127,711	739,360	5.79
Georgian Bay.....	148,834	853,166	5.73	128,336	747,746	5.83	118,982	667,699	5.61
West Midland.....	190,577	1,143,863	6.00	182,295	1,112,019	6.10	188,818	1,093,962	5.79
Lake Ontario.....	166,139	1,011,977	6.09	156,022	973,701	6.24	157,112	937,398	5.97
St. Lawrence and Ottawa	209,627	1,076,910	5.14	196,261	1,028,146	5.24	215,649	1,069,339	4.96
East Midland.....	74,786	403,359	5.39	74,376	407,582	5.48	67,899	357,858	5.27
Northern Districts.....	29,058	160,718	5.53	25,205	141,897	5.63	15,542	87,289	5.62
The Province.....	1,092,467	6,235,036	5.71	1,015,497	5,896,891	5.81	999,489	5,560,608	5.56

There is an increase in the number of fleeces in every district compared with the previous year, and the St. Lawrence and Ottawa group is the only one falling below its own record for the thirteen years. In every district, however, there is a decrease in the average

weight per fleece compared with that of the preceding year, the figures for the Province being 5.71 lb. per fleece against 5.81 in 1893, although the present years' average is well above that for the thirteen years, which was only 5.56 lb. per fleece. The heaviest average weight per fleece is found in the Lake Ontario counties, and the lightest in the St. Lawrence and Ottawa. The total clip reaches 6,235,036 lb., which is 338,145 lb. more than that of the previous year.

LIVE STOCK SOLD. The table following shows by county groups and for the Province the number of each class of live stock sold in 1893 and 1894:

Live stock sold.		Lake Erie.	Lake Huron.	Georgian Bay.	West Midland.	Lake Ontario.	St. Lawrence and Ottawa.	East Midland.	Northern Districts.	The Province.
Horses.....	{ 1894 1893	5,802 6,897	6,049 7,386	3,808 3,613	8,063 8,887	8,277 9,328	6,782 7,705	2,360 3,226	775 855	41,916 47,897
Cattle.....	{ 1894 1893	49,351 52,681	72,326 74,578	41,254 42,488	114,873 119,005	71,520 74,540	60,671 63,765	24,130 26,961	7,573 7,488	441,698 461,501
Sheep.....	{ 1894 1893	74,469 79,659	90,722 90,982	75,443 71,546	119,109 117,774	97,312 93,674	111,850 111,365	35,581 40,317	11,960 10,920	616,446 616,237
Hogs.....	{ 1894 1893	177,840 170,142	100,775 90,267	91,233 84,906	250,379 241,343	210,391 198,936	117,719 111,680	68,003 64,490	14,227 13,594	1,030,567 975,358
Poultry.....	{ 1894 1893	349,978 329,510	200,411 178,089	165,976 156,965	393,581 350,572	479,041 449,586	381,249 386,936	126,401 131,367	34,585 34,482	2,131,222 2,017,507

Taking the figures for the Province fewer horses and cattle were sold than in the previous year, but more sheep, hogs and poultry changed hands. The Georgian Bay group was the only one in which the number of horses disposed of was greater than in 1893. The Northern Districts are alone in showing an increase in the number of cattle sold. In the sales of sheep the Lake Erie, Lake Huron and East Midland groups did less business than in 1893. Every district showed an increase in the number of hogs marketed, while in poultry all the groups except the St. Lawrence and Ottawa and East Midland had an advance over their respective figures for the preceding year.

THE APIARY.

June reports regarding the condition of bees were variable. The loss during winter seemed about the average where hives were left on the stands, but the mortality appeared to have been greater than usual where the bees were wintered indoors. The fine weather of the late March and early April days gave bees an earlier outing than usual, but the wet and cold time which afterwards prevailed was very trying to the apiary. Several correspondents complained of spring dwindling, and losses from chilled brood and hunger were reported from various parts of the Province. There was practically no mention made of foul brood. With continued fine weather it was expected that colonies would pick up, and that honey-making would go rapidly forward.

In the reports sent in about the middle of August correspondents stated that there was about the usual amount of swarming in most apiaries, and that colonies were remarkably free from disease. Comparatively little honey was made from clover, but there was a good show of linden, and the bees made the most of it during the time of bloom. The

drouth lessened the supply of nectar in flowers, and it was expected that the average yield would be less than usual, being but a trifle over thirty pounds per colony. Honey was somewhat darker than usual, but of good flavor.

There was very little in the November returns regarding bees beyond what was reported in August. The surplus honey has been chiefly from alsike and basswood. What little white clover was extracted was described as rather poor quality. A case or two of foul brood was reported in the West Midland group. On the whole bees appeared to be in healthy condition, but in many instances feeding back may be necessary.

VALUE OF APIARY OUTFIT. The table following gives by county groups the number of hives of bees kept in the township municipalities of Ontario in 1892, 1893 and 1894, together with their value, including the outfit required, in 1893 and 1894 :

Bees.		Lake Erie.	Lake Huron.	Georgian Bay.	West Midland.	Lake Ontario.	St. Lawrence and Ottawa.	East Midland.	Northern Districts.	The Province.
		No.	No.	No.	No.	No.	No.	No.	No.	No.
No. of hives...	1894	36,019	25,159	14,644	29,146	39,544	46,231	8,094	1,257	200,094
	1893	37,816	27,786	14,019	31,244	38,594	46,382	8,161	1,166	205,168
	1892	36,191	28,924	12,630	28,201	38,672	43,730	7,064	1,010	195,822
		\$	\$	\$	\$	\$	\$	\$	\$	\$
Value of Bees and outfit ...	1894	179,126	139,685	78,575	167,578	207,983	226,867	44,857	6,903	1,051,574
	1893	201,855	186,265	72,663	209,213	222,465	220,952	42,569	6,963	1,162,945

There has been an increase in the number of hives in the Georgian Bay and Lake Ontario counties, and also in the Northern Districts, but the other five groups show a decrease, and there are only 200,094 hives in the Province, compared with 205,168 in 1893. The value of bees and outfit is estimated at \$1,051,574, which is \$111,371 less than the figures for the preceding year.

THE DAIRY.

August returns reported butter as rather scarce in some districts, while the cheese factories were being largely patronized. It was also stated that farmers were giving closer attention to dairying than ever before.

The November bulletin had the following to say concerning dairying: "This branch of agriculture is more than holding its own. While there was a great falling off in the milk flow in several counties in Western Ontario owing to the midsummer drouth, the returns from that half of the Province are still encouraging, while the reports from the dairy counties along the St. Lawrence are even more satisfactory. A most decided improvement is reported in the quality of butter, and most of that product has been disposed of at a paying price. Shorthorn grades are yet most frequently found in the dairies of the Province, but the introduction of Jersey blood is referred to by many correspondents, some of whom connect this with the test for butter-fat now practised in creameries and cheese factories. However, the Ayrshires are still most popular in the eastern dairy counties, while the Holsteins are also being tried in various parts of the Province. Correspondents in all the districts refer favorably to the visits of the Travelling Dairy to their respective sections."

CHEESE FACTORIES. The following table gives the statistics of 1,011 cheese factories operated in Ontario in 1894. These figures are given by groups of counties and are estimated from returns received from 656 factories. Comparative figures are given for the Province for twelve years:

Districts.	Number.	Quantity of—		Gross value of cheese.	Average No. of patrons.	Milk required to make one lb. of cheese.	Value of cheese per 100 lb.	Amount paid to patrons.	
		Milk used.	Cheese made.					Total.	Ave. per 100 lb. of milk.
		lb.	lb.	\$		lb.	\$ c.	\$	cts.
Lake Erie.....	77	74,897,984	6,917,462	661,921	5,697	10.83	9 57	542,132	72.4

Average 1883-94.	799	781,484,826	74,792,431	7,132,329	43,763	10.45	9 54

There were 1,011 cheese factories in operation in Ontario in 1894, being an increase of 114 over 1893. The average output per factory was 96,226 lb. of cheese in 1894, compared with 96,061 lb. in the year previous, 109,637 in 1892 and an average of 93,637 lbs. for twelve years. The total output of cheese in 1894 was 11,117,828 lb. in excess of 1893, while the gross amount of money received was \$1,025,538 greater than in 1893. The total amount paid to patrons in 1894 was \$7,931,022, which is equivalent to 77.2 cents per 100 lb. of milk, or \$8.15 per 100 lb. of cheese. The cheese sales averaged \$9.70 per 100 lb., so that the average expense of making, hauling, etc., averaged \$1.55 per 100 lb. of cheese. The number of patrons shows an increase of 3,969. Over 46 per cent. of the factories are to be found in the St. Lawrence and Ottawa group, which produces

42,797,773 lb. of cheese or 44 per cent. of the total for the Province. The largest individual factories are found in the West Midland group. The quantity of milk required to make a pound of cheese averaged 10.56 lbs. varying from 10.35 in the St. Lawrence and Ottawa group to 10.89 in the Lake Huron group. The best prices were obtained in the former group, being eight cents per 100 lb. of cheese over the average for the Province.

MONTHLY STATISTICS OF CHEESE FACTORIES. The following table has been compiled from returns of cheese factories which give full monthly statistics. The number used for 1894 was 158 factories whose output was 16,989,246 lb. of cheese. The 100 reporting for 1893 produced 11,849,642 lbs.

Months.	Milk required to make one lb. of cheese.		Gross value of cheese per pound.		Gross value of product of 100 lb. of milk.		Per cent. of cheese made in month.	
	1894.	1893.	1894.	1893.	1894.	1893.	1894.	1893.

The average of each year shows that the milk is poorest as a cheesemaker in June, while it rapidly gains in richness till the close of the season. June, July and August are the popular cheese months in the order named.

CREAMERIES. The following table gives the statistics furnished by 39 public creameries for 1894, showing the quantity and value of butter made, the average number of patrons and the average price per lb.; of the 39 creameries making returns 16 are operated in summer, 15 in winter and 8 are going all the year from twice a week up :

Creameries.	No. of returns.	Butter made.		Average No. of patrons.	Average price of butter per pound.	Milk required to make 1 lb. of butter.	Cream requir'd to make 1 lb. of butter.
		Quantity.	Value.				
		lb.	\$		cts.	cts.	lb.
Summer	16	664,140	132,905	1,771	20.01	24.37
Winter	15	216,960	49,533	624	22.83	23.19
All the year	8	191,417	42,167	419	22.03	23.70
Total :							
1894.....	39	1,072,517	224,605	2,814	20.94	23.79	4.00
1893.....	37	1,353,785	287,078	3,926	21.21	23.53	4.28
1892.....	29	1,867,758	384,576	4,246	20.59	25.21	4.25
1891.....	30	1,402,309	287,559	3,292	20.51	24.61	4.15

Our list of creameries now numbers 115, so that less than one-third have assisted the efforts of this Bureau to get at complete statistics of the butter industry as carried on at public creameries.

REMARKS OF CORRESPONDENTS.

Gosfield N., Essex : We have formed a joint stock company and are building a cheese factory for next summer's operations. We have had none in this section.

Camden, Kent : There is a variety of opinions regarding butter and cheese as to which is the most profitable, but there certainly has been a great improvement of late in making butter.

Harwich, Kent : I think there is some improvement in the quality of butter, but the price is about the same as last year.

Raleigh, Kent : The Farmers' Institute of West Kent has offered a prize of \$25 for the best 25 lb. of dairy butter, to be given at the county fair.

Raleigh, Kent : The butter industry is looking up. An interest has been awakened in the improved methods of manufacture by a series of meetings of the Travelling Dairy and special prizes offered by the Farmers' Institute, from which good results are already seen.

Raleigh, Kent : There is a perceptible improvement in making butter, which is largely credited to the Travelling Dairy. The butter is better in quality on the average, and for the last three months twenty per cent. better in price.

Malahide, Elgin : Dairying and hog raising have been the most profitable branches of agriculture for the farmers of this county for 1894. The summer drouth greatly affected the supply of milk and succulent food for hogs during the summer months. This could have been greatly overcome by providing a sufficient supply of foods used for soiling. The soiling system not only enables the farmer to keep more stock on his farm, thereby enriching his land, but ensures against much loss from drouth.

Bertie, Welland : Prices for butter have ruled higher, and the quality generally is constantly improving.

Pelham, Welland : The butter industry is in a better condition than formerly, as more attention is being paid to it since the Government has been sending teachers throughout the country.

Plympton, Lambton : Home made butter has commanded a good price, which has led many to look with favor on dairying compared with other branches of agriculture.

Sombra, Lambton : Dairying is scarcely holding its own. Milch cows are too readily sold these hard times. There is very little soiling done. The quality of our butter does not seem to improve much.

Plympton, Lambton : Farmers must change their old modes. We now see that we cannot compete with other countries better adapted for growing wheat than ours. We must study what we can produce and sell better than our competitors. I am strongly in favor of following dairying almost entirely, as we see less variation in that product than in any other, and there is a ready market for all butter and cheese. Pork raising is profitable, and so also with poultry and fruit raising.

Morris, Huron : Pork raising and dairying are most profitable now. Creameries should be encouraged. I believe that the future success of the farmers of Ontario will depend largely upon the development of the dairy industry.

Morris, Huron : The cheese industry is improving. Farmers are turning their attention more to this line. The price of butter is about three cents in advance of last year.

Turnberry, Huron : Dairying is paying better than anything else on the farm. The most of the milk goes to the cheese factory.

Wawanosh E., Huron : The dairy industry was not profitable this year, as the weather was very dry. There are more patrons of cheese than of butter.

Brant, Bruce : Fifty per cent. or more of the farmers patronize the cheese factories, and keep all the cows—or more—that can be kept with profit. A few send their cream to the butter factory.

Glenelg, Grey : The dairy industry has not been very satisfactory this season, chiefly on account of the dry weather decreasing the flow of milk. I think cheese is gaining on butter, owing to the more systematic method of handling and selling it.

Innisfil, Simcoe : There are more cows kept now for dairy purposes than have been of late years.

Gwillimbury W., Simcoe : There is no creamery in this township, but more attention has been given to the making of butter, and results have been more satisfactory since the Travelling Dairy was with us.

Vespra, Simcoe : Most farmers patronize the cheese factory in summer, and make butter themselves in winter. The quantity and quality is rather lower than last year, as the drouth in summer made pastures poor.

Biddulph, Middlesex : The butter business has been somewhat demoralized, but the cheese industry promises to be good. The farmers seem to have more confidence in it every year.

Ekfrid, Middlesex : While the dairy business is in a satisfactory state, the butter business cannot compare with the manufacture of cheese, for the want of co-operation and the use of proper appliances.

Blandford, Oxford : The cheese industry has been very good indeed, both in quality and extent of make, but the butter, with a few exceptions, is as bad as it can be.

Oxford E., Oxford : Nearly all the milk goes to cheese factories here in summer.

Oxford W., Oxford : Cheese still takes the lead, but several factories have put in a plant for butter making in the winter.

Zorra E., Oxford : The cheese industry has been very prosperous. Nearly all the milk of this township goes into the manufacture of cheese.

Dumfries S., Brant : The only suggestion that I can offer is for the farmers to chop their grain and convert it into cheese, butter, pork, eggs and poultry. Make the best cheese and butter and keep the right kind of hogs, that is the long, lean fellows, and the farmers of this country, before ten years roll by, will be ashamed to talk about hard times.

Fullarton, Perth : The dairy industry has been active, but in consequence of the drouth milk fell off dreadfully, and consequently the production of butter and cheese was not large.

Logan, Perth : Cheese had the best of it until the end of August, when butter went up and cheese declined in price.

Minto, Wellington : People have faith in dairying yet, but cheese is chiefly made.

Guelph, Wellington : A cheese factory was recently started in this township, and patrons are well satisfied. There is a better quality of butter being made—more care in making, feeding cows and in handling milk.

Mulmur, Dufferin : Butter making is the chief dairy product here. There is some improvement in the quality, and the price is about the average.

Gainsborough, Lincoln : More attention is given to the dairy than formerly.

Grimsby S., Lincoln : Butter is about the same in quality as last year, but perhaps a little lower in price. It has paid very well, however ; in fact it is the only thing farmers have made money from.

Grimsby S., Lincoln : A joint stock company formed and registered to start a cheese and butter manufactory in under way for this township with fair prospects.

Trafalgar, Halton : A good many farmers use the cabinet creamers, and are using other improved methods of making butter. The price has been about five cents per lb. less than last year—that is, for the last three months and the corresponding months of last year.

Chinguacousy, Peel : More attention is being paid to dairying. The quality of the butter is steadily improving, but the price is hardly so good as last year.

Gwillimbury E., York : The new cheese factory has done well during the summer.

King, York : Interest in dairying is increasing. There is now quite a rivalry between butter and cheese.

Markham, York : More attention will be given to dairying next year. One creamery and one cheese factory are now in course of erection. The quality of butter made has perhaps not been quite so good as last year, but prices are a shade better.

Markham, York : The interest in dairy farming still increases. Silos are being built, and preparations for building for dairy farming in 1895 is quite large in this vicinity.

Markham, York : The quality of our butter is improving each year.

Vaughan, York : I don't know of any cheese being made in this locality. There are two creameries near here. They have both done a fairly good season's work. I think the prices of butter have been as good this year as last.

Mara, Ontario : The dairy industry is improving each year. The supply of milk to the cheese factory kept up well; and although this was a very bad year for milk on account of the dry weather and the fly, factories continued to run up to November 3rd. There is not much difference in the profit between butter and cheese. The price of butter kept up better than last year, and the quality is improving each year.

Cartwright, Durham : About two-thirds of the milk of this township is made into cheese and the balance into butter. The former manufacture has been most profitable to the farmers this season. The quality of our butter seems to have been as good as last year, but the prices have been lower by three or four cents a pound.

Cavan, Durham : Butter is scarce here, as we have so many cheese factories.

Clarke, Durham : Dairying has been fairly good this year. It pays better than raising grain. I think cheese pays better than butter. However, the hogs do too much singing when cheese is made ; they like the butter making best.

Darlington, Durham : The dairy industry is progressing. There is a large amount of butter made in private dairies, but we have no creameries, although we have several cheese factories.

Alnwick, Northumberland : The dairy industry is largely practised here. Cheese is much in advance of butter, still a large quantity of butter is being exported. Butter is ahead of last year both as regards price and quality.

Haldimand, Northumberland : Cheese factories never did better. There is no public dairy in this township, but I believe the private dairies have done well, having made a good quality of butter which sold for a fair price.

Sophiasburg, Prince Edward : The dairy industry is on the increase, more cows being kept. Very little butter is made, cheese being the article. Our milk is sold by quality as well as quantity, being graded according to the butter fat found.

Storrington, Frontenac : The dairy business is just booming in this county, which has 45 cheese factories.

Bastard, Leeds : This is predominately a dairying county—we claim that it is the banner county for cheese. At present there is only one factory making butter alone, but there are several which have put in creamery machinery and will make butter from about the 15th of November until the 15th of January, and some later.

Williamsburg, Dundas : The dairy industry, so far as cheese is concerned, has been fully up to past seasons, with the exception of September and October, when there was a large shrinkage owing to dry weather, although the early part of the spring compensated for that. I can say very little about butter, but think it cannot pay, judging by the fact that some patrons deserted the butter factories in favor of cheese.

Roxborough, Stormont : Cheese making proved very satisfactory this season. Very little butter is made in this neighborhood. In fact, some farmers buy butter for family use, preferring to send the milk to the cheese factory.

Lancaster, Glengarry : Both creameries and cheese factories are in operation here, but it is generally held that cheese pays better than butter.

Hawkesbury E., Prescott : There are sixteen cheese factories in this township and no creameries, and therefore I cannot make a comparison.

Hawkesbury E., Prescott : Butter is nowhere compared with cheese. Where an occasional farmer makes butter he gets a market mostly among his neighbors who send all their milk to the cheese factory. Butter is increasing in quality every year, but the price is rather lower than last year.

Fitzroy, Carleton : There is scarcely any butter made except that which is needed for home consumption. Nearly all the milk is made into cheese.

Gower N., Carleton : The manufacture of cheese has taken the place of butter nearly altogether. A few who have silos make butter in winter.

Osgoode, Carleton : Dairying has been successful this year ; there has been a good supply of milk. The cheese factories here are running later than usual this year. Where a man has not to hire help I believe butter pays better than cheese.

Osgoode, Carleton : Very little butter is made here. There are sixteen cheese factories in this township.

Drummond, Lanark : It is no use to mention butter so far as this district is concerned, as there is not enough made for local use. Cheese is all the rage here, and perhaps it is just as well that it is so.

Carden, Victoria : The dairy industry is not very good. The production of butter is better than that of cheese. The quality of butter has been good, but the price has been from two to three cents less than last year.

Mariposa, Victoria : More interest is being taken in dairying, and cheese making is on the increase.

Verulam, Victoria : Most farmers are trying to increase their stock of milch cows, more especially, I think, with the intention of patronizing the cheese factories. At present about one-third more milk goes to the cheese factories than is made into butter.

Burleigh, Peterborough : There is less butter made on account of the cheese factories. While the quality of butter has been good the price has been about three cents less a pound than last year.

Chandos, Peterborough : There is now a cheese factory in this locality, and nearly everyone sends milk to it. The butter market has been very uncertain this season, and prices have been about four cents lower than last year.

Harvey, Peterborough : Butter has improved in quality wonderfully since the Travelling Dairy visited us, and the price has been good this season.

Otonabee, Peterborough : Nearly nine-tenths of our farmers are into the cheese industry in summer, and we are making more butter in winter. Thanks to the Dairy Conventions and Farmers' Institutes, farmers are endeavoring to make the cows work for their food ten months instead of six or seven as formerly.

Dysart, Haliburton : Everybody wants the travelling dairy to come again. It was regarded as a curiosity on its first visit, but if it came again people would ask questions and seek information on doubtful points. Pray send the Travelling Dairy here again.

Dysart, Haliburton : Our cheese factory has obtained exceptionally good prices for its cheese. All who can get to the cheese factory prefer to send their milk there rather than make butter.

Tyendinaga, Hastings : Butter paid well this year, and the quality was fine.

Monck, Muskoka : There has been a good demand for butter at a good price all this season. Owing to the drouth pasture and water was so scarce early in the summer that cows hardly gave half as much as usual of milk, and so butter is very scarce.

Morrison, Muskoka : Butter has barely held its own either in quality, quantity or price this season.

Watt, Muskoka : Butter is the principal dairy production here, but we are slowly creeping into the cheese business. The milking stock consists chiefly of the common scrub, but we are making some slight advance in better breeds. Butter is certainly in quite a few instances improved in quality, and the prices fully three cents per lb. more than the average of a few years ago. The Farmers' Institute and Travelling Dairy, I think, may be credited with this improvement.

St. Joseph, Algoma : Dairying is increasing every year. Butter-making is becoming one of the leading industries of the township, and the make will compare favorably with that of any part of the Province. The price is a cent or two higher than that of last year, and there is an increasing demand.

CHEESE FACTORIES AND CREAMERIES IN ONTARIO.

PART III.

VALUES, RENTS AND FARM WAGES.

VALUES OF FARM PROPERTY.

The following table gives the values of farm lands, buildings, implements and live stock by county groups for 1893 and 1894, and for the Province for each of the twelve years 1883-1894 :

Districts.	Farm land.	Buildings.	Implements.	Live stock.	Total farm property.
	\$	\$	\$	\$	\$
Lake Erie..... { 1894.. 84,973,369	27,724,505	7,142,076	13,489,680	133,329,630	
{ 1893.. 87,453,505	27,041,527	7,013,362	14,164,546	135,672,940	
Lake Huron..... { 1894.. 66,687,263	21,128,984	5,569,007	13,513,497	106,898,751

	1893.. 602,664,361	200,189,888	51,435,919	116,070,902	970,361,070
	1892.. 615,828,471	195,644,258	51,003,020	117,501,495	979,977,244
	1891.. 621,245,223	191,268,327	50,651,442	108,721,076	971,886,068
	1890.. 622,886,000	193,438,826	50,515,583	104,086,626	970,927,035
	1889.. 632,329,433	192,464,237	51,685,706	105,731,288	982,210,664
	1888.. 640,480,801	188,293,226	49,754,832	102,839,235	981,368,094
	1887.. 636,883,755	184,753,507	49,248,297	104,406,655	975,292,214
	1886.. 648,009,828	183,748,212	50,530,936	107,208,935	989,497,911
	1885.. 626,422,024	182,477,905	48,569,725	100,690,086	958,159,740
	1884.. 625,478,706	173,386,925	47,830,710	103,106,829	949,803,170
	1883.. 654,793,025	163,030,675	43,522,530	100,082,365	961,428,595

The figures for the Province show a decrease of \$15,418,244 in the value of farm land, and a decline of \$4,523,250 in the value of live stock, while an increase of \$3,881,-

678 is observed in the value of buildings and a gain of \$94,253 in the value of implements, the net result showing a falling off in the total of farm values of \$15,965,563 as compared with 1893. The Northern Districts show an increase in total value, but every other group fails to equal its own total figures for 1893.

The estimated value of farm lands has decreased \$67,546,908 as compared with 1883, notwithstanding that the cleared land has increased from 10,539,557 acres in 1883 to 12,292,610 acres in 1894. The decreases by districts are as follows: Lake Erie, \$6,319,641; Lake Huron, \$11,972,937; Georgian Bay, \$5,496,378; West Midland, \$26,942,325; Lake Ontario, \$18,552,903; East Midland, \$4,260,344. The St. Lawrence and Ottawa group shows an increase of \$4,206,194, and the Northern Districts \$1,791,426. Farm buildings have increased by \$41,040,891 since 1883; implements by \$8,007,642 and live stock on hand by \$11,465,287. As will be seen below, these improvements on the farm have no more than kept pace with the progress of clearing. The average value per cleared acre for buildings, implements and live stock combined was \$29.86 in 1894 as against \$28.63 in 1883. There is a net decrease in the total value of farm property since 1883 of \$7,033,088, though the Lake Erie group shows an increase of \$1,820,790, Georgian Bay of \$652,751; the St. Lawrence and Ottawa of \$19,901,269, and the Northern Districts of \$4,042,187.

VALUE PER ACRE OCCUPIED. The value per acre occupied of the various classes of farm property is given in the following table, by county groups and for the Province, for the years 1893 and 1894:

Districts.	Farm lands.		Buildings.		Implements.		Live stock.		Total farm property.	
	1894.	1893.	1894.	1893.	1894.	1893.	1894.	1893.	1894.	1893.
	\$ c.	\$ c.	\$ c.	\$ c.	\$ c.	\$ c.	\$ c.	\$ c.	\$ c.	\$ c.
Lake Erie.....	36 39	37 40	11 87	11 57	3 06	3 00	5 78	6 06	57 10	58 03
Lake Huron	28 94	29 53	9 17	8 93	2 41	2 41	5 86	6 24	46 38	47 11
Georgian Bay	22 49	23 33	7 76	7 62	2 23	2 24	5 03	5 21	37 51	38 40
West Midland	38 25	39 11	13 51	13 27	3 19	3 19	7 29	7 50	62 24	63 07
Lake Ontario.....	40 75	42 19	14 96	14 66	3 39	3 38	6 82	7 19	65 92	67 42
St. Lawrence and Ottawa	18 59	18 99	6 74	6 69	1 81	1 83	3 85	3 93	30 99	31 44
East Midland	13 22	13 57	4 47	4 35	1 19	1 21	2 73	2 89	21 61	22 02
Northern Districts.	3 17	3 20	95	96	34	34	94	97	5 40	5 47
The Province.....	25 49	26 25	8 86	8 72	2 23	2 24	4 84	5 05	41 42	42 26

There is a decline of 76 cents in the value per acre of farm land occupied, of 1 cent per acre in the case of implements, and of 21 cents in the matter of live stock, while the value of live stock per acre occupied has gone up 14 cents. The result is that the total value of farm property is now given as \$41.42 per acre occupied, as against \$42.26 in 1893, which means a decrease of 84 cents. Every district falls below its last year's total. In farm lands and live stock all the groups show a loss, while in buildings all but the Northern Districts exhibit a gain. In implements the figures for three districts are unchanged, and only a slight rise or fall is to be seen in any of the groups.

The following table gives a still better basis of comparison, as the values are here given per acre cleared, by county groups and for the Province:

Farm property.	Lake Erie.	Lake Huron.	Georgian Bay.	West Midland.	Lake Ontario.	St. Lawrence and Ottawa.	East Midland.	Northern Districts.	The Province.			
									1894.	1893.	1883.	1883-94.
	\$ c.	\$ c.	\$ c.	\$ c.	\$ c.	\$ c.	\$ c.	\$ c.	\$ c.	\$ c.	\$ c.	\$ c.
Buildings	18 33	14 87	13 99	18 40	19 35	14 88	13 54	10 45	16 60	16 50	15 00	16 46
Implements ...	4 72	3 92	4 02	4 36	4 38	4 00	3 62	3 73	4 19	4 24	4 13	4 36
Live stock....	8 92	9 51	9 08	9 93	8 81	8 51	8 28	10 27	9 07	9 57	9 50	9 37
Total.....	31 97	28 30	27 09	32 69	32 54	27 39	25 44	24 45	29 86	30 31	28 63	30 91

Buildings have increased in value 10 cents per acre cleared, compared with last year, while implements have decreased 5 cents and live stock 50 cents, which means a total decrease of 45 cents per acre cleared. The Lake Ontario group shows the best value in farm buildings per acre cleared, the Lake Erie district has the highest value in implements, while the West Midland counties have the best figures for live stock, and also have a slight lead in the total over the other two groups named.

RENTALS OF LEASED FARMS. In the following table the average value and rental of such leased farms as were reported on farmers' schedules returned to this Bureau in 1894 is shown by districts.

Leased farms.	Lake Erie.	Lake Huron.	Georgian Bay.	West Midland.	Lake Ontario	St. Lawrence and Ottawa.	East Midland.	Northern Districts.	The Province.
Average value—	\$	\$	\$	\$	\$	\$	\$	\$	\$

of farm..... { 1886-94	4 12	4 24	4 32	4 23	4 47	3 88	4 59	4 98	4 27

The average value of the rented farm (including buildings) reported in 1894 was \$5,297, and the rental averaged \$238. In 1893 the figures were \$6,107 and \$267. The average area of the rented farm from those reported in 1893 was 134 acres with 98 acres cleared. In 1894 the averages are about 127 acres with 90 acres cleared. The rental was equivalent to 4.49 per cent. of the value of land and buildings in 1894; it was 4.37 per cent. in 1893, and 4.27 per cent. as the average of nine years, 1886-94. Rentals, owing to leases, do not fall as quickly as the values decline.

VALUES OF LIVE STOCK.

VALUE OF HORSES. The following table gives by county groups and for the Province the value of each of the four classes of farm horses, together with their total value for 1893 and 1894; also the value of all classes of horses sold in the year :

Districts.	Working horses.	Breeding mares.	Colts.	Stallions.	Total on hand.	Total sold in year.
	\$	\$	\$	\$	\$	\$
Lake Erie.....	3,982,478	814,862	1,288,942	178,016	6,264,298	444,119
Lake Huron.....	3,086,486	766,421	1,020,535	115,383	4,988,825	469,487
Georgian Bay.....	2,639,332	642,580	768,188	68,817	4,119,417	313,203
West Midland.....	5,616,984	1,415,396	1,894,364	342,718	9,269,462	607,368
Lake Ontario.....	6,234,751	1,483,262	1,982,208	287,955	9,988,176	684,984
St. Lawrence and Ottawa...	5,050,441	1,064,217	1,350,498	232,862	7,698,018	478,621
East Midland.....	1,989,718	436,319	581,735	119,215	3,126,987	168,248
Northern Districts.....	485,673	157,952	109,811	36,995	790,431	56,470
Totals..... { 1894	29,086,363	6,781,009	8,996,281	1,381,961	46,245,614	3,222,500
{ 1893	29,791,713	8,328,810	10,742,980	1,663,969	50,527,472	4,004,524

Owing to a decrease in value in every class, the total value of horses now on hand in the Province is only \$46,245,614, compared with \$50,527,472 in the preceding year. The greatest falling off is found in the classes of colts and breeding mares, although a relative decrease is to be observed in the value of stallions. The amount received for all classes of horses sold during the year was \$3,222,500, which is \$782,024 less than was realized in 1893.

VALUE OF CATTLE. In the table here given the values of the various classes of cattle, their total values for 1893 and 1894, and the value of cattle sold during 1894, are given by county groups and for the Province :

Districts.	Working oxen.	Milch cows.	Store cattle.	Other cattle.	Total on hand.	Total sold in year.
	\$	\$	\$	\$	\$	\$
Lake Erie.....	24,576	2,589,351	996,717	1,183,366	4,794,010	1,493,655
Lake Huron.....	18,727	2,448,155	2,259,988	1,654,423	6,381,293	2,750,397
Georgian Bay.....	33,754	1,920,751	1,012,718	1,168,821	4,136,044	1,371,853
West Midland.....	12,793	5,565,291	2,747,888	2,588,937	10,914,909	4,627,669
Lake Ontario.....	22,689	4,448,561	1,236,805	1,958,232	7,666,287	2,578,741
St. Lawrence and Ottawa ..	24,727	6,606,369	1,215,525	1,950,253	9,796,874	1,594,093
East Midland.....	33,794	1,915,664	468,896	697,948	3,116,302	611,752
Northern Districts.....	55,067	368,927	142,470	205,404	771,868	191,096
Totals..... { 1894	226,127	25,863,069	10,081,007	11,407,384	47,577,587	15,219,256
{ 1893	245,508	25,420,385	10,378,123	11,674,009	47,718,025	16,671,021

There is an increase in the value of milch cows in the Province, and a decrease in the other three classes, the total value of cattle on hand being but slightly changed. The total value of cattle sold in the year amounted to \$15,219,256, or \$1,451,765 less than in the year before. As usual, the West Midland counties lead every other group in the value of cattle on hand and cattle disposed of during the year. The St. Lawrence and Ottawa district comes second in the value of cattle on hand, but is fourth in the value of cattle sold during the year.

SHEEP AND HOGS. The appended table shows the values of all classes of sheep and swine on hand and sold in 1894 by county groups and for the Province; also the figures for the Province for 1893:

Districts.	Sheep.				Hogs.			
	Over one year.	Under one year.	Total on hand.	Total sold in year.	Over one year.	Under one year.	Total on hand.	Total sold in year.
	\$	\$	\$	\$	\$	\$	\$	\$
Lake Erie.....	611,908	340,061	951,969	307,396	479,228	717,031	1,196,259	1,751,301

Northern Dists.	141,106	64,685	205,791	46,779	56,095	52,545	108,640	136,161
Totals.. { 1894	5,580,936	3,025,735	8,606,671	2,552,267	2,981,218	3,928,044	6,909,262	10,158,978
{ 1893	5,799,762	3,216,356	9,016,118	2,784,288	3,078,995	3,543,134	6,622,129	10,296,828

Sheep on hand show a decline in value in both classes, and the value of those sold is also less than in 1893. The value of old hogs on hand is \$97,777 less than for the previous year, but the value of young hogs on hand is \$384,910 more than was reported for 1893. The value of hogs sold during the year was \$10,058,978, or \$137,850 below the sales of 1893.

VALUE OF POULTRY AND TOTAL LIVE STOCK. The value of poultry by classes, and also the total value of live stock on hand and sold during the year is given in the following table by county groups and for the Province:

Districts.	Poultry.					Total value of live stock on hand.	Total value of live stock sold in year.
	Turkeys.	Geese.	Other fowls.	Total on hand.	Total sold in year.		
	\$	\$	\$	\$	\$	\$	\$
Lake Erie.....	49,072	23,133	210,939	283,144	118,255	13,489,680	4,114,726

Northern Districts...	7,078	4,617	26,114	37,809	13,360	1,914,539	443,866
Totals.. { 1894..	461,876	250,324	1,496,318	2,208,518	782,588	111,547,652	31,935,589
{ 1893..	439,613	253,197	1,494,348	2,187,158	753,695	116,070,902	34,510,356

There is a slight falling off in the value of geese on hand, but turkeys and other fowls have increased in value, the total value of poultry on hand being \$2,208,518, or \$21,360 more than in 1893. There is also an increase in the value of poultry sold compared with the previous year. The total value of live stock on hand is \$111,547,652, a decrease of \$4,523,250 compared with 1893, and the total value of live stock sold during the year amounts to \$31,935,589, which is less by \$2,574,767 than in the previous year.

VALUES OF LIVE STOCK PER HEAD. The following table gives the value of the various classes of live stock per head on hand and disposed of during the year :

Farm Live Stock.	Lake Erie.	Lake Huron.	Georgian Bay.	West Midland.	Lake Ontario.	St. Lawrence and Ottawa.	East Midland.	Northern Districts.	The Province.

Horses have decreased in value in every class, while the average price paid for horses sold during the year is \$77, compared with \$84 in 1893. Cattle have also declined in value in every class, the average price per head sold being \$34.46 as against \$36.12 in the preceding year. Sheep have also gone down in value in both classes, and the average price of those sold has been \$4.14 compared with \$4.52 in 1893. Hogs have not been an exception to the rule, as both classes have declined in value, and the average price per head sold is only \$9.86, compared with \$10.56 in the year preceding. The best average price per head for horses was paid in the Lake Ontario district; cattle and sheep realized their best values in the West Midland group, while hogs commanded the highest average price in the St. Lawrence and Ottawa counties.

VALUES OF CROPS.

MARKET PRICES. The figures contained in the following table are made up from reports from twenty-nine fairly distributed market points, and the figures are taken for the period when each of the various articles of farm produce comprising the table is marketed. The average prices for the thirteen years 1882-94 are as given :

Markets.	Fall wheat, per bush.	Spring wheat, per bush.	Barley, per bush.	Oats, per bush.	Rye, per bush.	Peas, per bush.	Corn (in ear), per bush.	Buckwheat, per bush.	Beans, per bush.	Potatoes, per bush.	Hay, per ton.	Wool, per lb.

None of the crops equal their average market prices for the thirteen years. Fall wheat, spring wheat, rye and hay are lower in price than in any other year of the table, and only one or two worse years are to be found for any of the other items.

VALUES OF CROPS. The value of each crop, based upon market prices, acreage and yield, is given in the following table for each of the five years, 1890-94, together with the average for the thirteen years, 1882-94 :

Crops.	1894.	1893.	1892.	1891.	1890.	Average 1882-94.

Turnips	6,169,449	5,697,535	6,354,164	6,885,345	4,704,056	4,707,879
Hay	27,028,512	37,921,575	35,955,672	28,498,224	34,232,024	32,443,862
Totals	94,055,392	101,886,557	110,562,493	130,866,023	114,382,305	112,958,578

Oats, corn, buckwheat, beans, mangel-wurzels, carrots and turnips show an increase over their respective averages for the thirteen years, while barley, oats, rye, corn, beans, pota-

toes, mangels, carrots and turnips each give higher figures than in 1893. The great decrease in the value of hay, however, brings the total of all crops for this year down to \$94,055,392.

CROP VALUES BY COUNTY GROUPS. The table following gives the value of field crops by county groups for the past five years, together with the annual average for the the thirteen years, 1882-94.

Districts.	1894.	1893.	1892.	1891.	1890.	1882-94.
	\$	\$	\$	\$	\$	\$
Lake Erie.....	12,013,990	13,268,186	13,040,993	17,117,703	14,656,955	14,349,758

Northern Districts.....	1,573,277	1,793,073	2,024,446	1,652,698	1,739,656	1,461,219
The Province.....	94,055,392	101,886,557	110,562,493	130,866,023	114,382,305	112,958,578

All of the groups experience a decrease in value compared with their respective figures for 1893, and the Northern Districts alone show an increase compared with the average for the thirteen years. The West Midland group again leads in the value of all crops raised on the farm, but it should be borne in mind that the Lake Ontario counties (which is still ahead in the average for the thirteen years) makes the best showing of crop values per acre occupied.

VALUE OF PRODUCE PER ACRE UNDER CROP. The value per acre raised of each of the staple field crops is given in the following table by county groups and by the Province; also the total for 1893 and the average for the thirteen years, 1882-94. The average value of all crops per acre raised is also given:

Crops.	Lake Erie.	Lake Huron.	Georgian Bay.	West Midland.	Lake Ontario.	St. Lawrence and Ottawa.	East Midland.	Northern Districts.	The Province.

All crops:											
1894.....	11 47	11 60	11 65	12 33	11 34	10 89	10 22	11 18	11 44
1893.....	12 68	12 64	12 54	14 03	12 37	12 01	11 45	13 07	12 65
1882-94.....	15 00	14 96	14 59	16 12	14 79	13 75	13 11	14 40	14 75

Both yield and price go to make up the results shown in this table. Not one group has as good a showing for all crops as in 1893, and in that year the figures were lower than

the average of those preceding. The West Midland counties have the best records, namely, \$12.33 per acre in 1894, \$14.03 in 1893, and \$16.12 in 1882-94. Fall wheat, spring wheat, barley, potatoes, mangels, carrots and turnips realize more per acre than in 1893, but not a single item in the table comes up to its own average for the thirteen years.

PER CENT. RATIOS OF VALUES PER ACRE. By means of per cent. ratios the following table compares the values per acre of the various crops with their respective averages, for the thirteen years, 1882-94, by county groups and for the Province :

Districts.	Fall weat.	Spring wheat.	Barley.	Oats.	Rye.	Peas.	Corn.	Buckwheat.	Beans.	Potatoes.	Mangel-wurzels.	Carrots.	Turnips.	Hay.	All crops.
Lake Erie	67	60	74	78	76	68	81	83	80	59	104	112	103	77	76
Lake Huron.....	70	70	76	85	86	80	94	92	93	69	102	102	100	69	78
Georgian Bay	70	70	75	86	67	84	101	100	87	66	97	95	108	73	80
West Midland.....	70	77	70	76	85	77	97	102	102	77	96	90	98	70	76
Lake Ontario.....	72	57	61	72	76	75	94	85	89	70	91	91	99	82	77
St. Lawrence and Ottawa....	68	57	68	72	68	80	103	82	77	80	97	98	101	82	79
East Midland	66	67	71	80	76	86	94	82	77	65	94	98	102	76	78
Northern Districts	55	50	70	79	65	79	103	78	99	68	124	103	102	84	78
The Province.....	69	62	68	77	73	79	91	84	81	72	96	95	100	77	78

The low range of figures is very noticeable. Taking the figures for the Province, it will be seen that only one item touches 100, and nine of the crops fall below the standard in every district. The wheats and barley show the lowest percentages. Looking at the average of all crops by county groups the figures will be found remarkably close. The district which leads (Georgian Bay) has a per cent. ratio of 80, the next has 79, three others follow with 78, one has 77 and the remaining two 76.

LABOR AND WAGES.

Out of every eight correspondents reporting in June seven stated that there was a sufficiency of labor, and as regards quality, one out of every three men offering for farm help was considered a poor hand. The result of the large number of men seeking rural employment in the spring and early summer was seen in the lowering of the scale of wages. The average amount paid monthly, with board, was \$16.48, compared with \$17.17 in the previous year. Without board, monthly wages averaged \$24.48, or 22 cents below the average rate of the preceding year. Day laborers averaged 83 cents with board, a falling off of 5 cents compared with 1893; while these working by the day, without board, received but \$1.11, or 6 cents less than in the year previous. Domestic servants were still scarce on the farm; the woman question, it was thought, had yet to be settled in that quarter.

The August bulletin said: "The general tenor of the answers as to a sufficiency of farm labor offering, and the rates of wages paid harvest hands by the day or month, is that with a few local exceptions the supply in all parts of Ontario was fully equal to the demand, with a strong tendency towards an over-supply. Complaints are made in several sections, notably in the Niagara Peninsula and in the County of Huron, that the "tramp" element constituted a considerable part of the farm labor offering. Again,

more than one correspondent intimates that the continued increase in the use of agricultural machinery in no small degree tends to lessen the demand for farm hands during harvesting. While a lowering tendency is perceptible in the matter of wages all round, yet the rates prevailing appear more uniform throughout Ontario than formerly. The average rates of wages for harvest hands throughout the Province appear to be about as follows: Per day with board, 90 cents to \$1. Per month (4 to 6 months) with board, \$15 to \$18; without board, \$18 to \$26. In cases of exceptional ability, however, as high as \$28 to \$30 is reported as being paid."

The following was contained in the November bulletin: "Four things tend to lead to the opinion that a fall rather than a rise may occur in the rate of farm wages: the low prices prevailing for most farm products, the abundance of labor offering, the endeavor on the part of so many farmers to do the work within their family aided by improved machinery, and the fact that more land than ever before has been seeded down for pasture. Correspondents do not speak highly of the average quality of the labor available, while a number use rather disparaging terms regarding the imported article. Owing to the depression in the cities, domestic servants are hardly as scarce as in former years, as a considerable number are seeking rural occupation."

WAGES OF FARM LABORERS. The following table gives the rates of farm wages by the year and by the month, with and without board, by county groups and for the Province, in 1893 and 1894, together with the average for the thirteen years 1882-94; also the monthly wages of domestic servants on the farm:

Districts.	Per year.						Per month in working season.									Domestics per month with board.	
	With board.			Without board.			With board.			Without board.

Northern Districts.	168	185	173	265	295	276	18 79	19 23	19 40	27 73	27 00	28 98	6 34	6 29			
The Province....	156	160	161	247	255	253	16 55	17 13	17 42	25 61	25 97	26 66	6 23	6 47			

The average yearly rate of wages for the Province is \$156, which is \$4 below that of the previous year, every district showing a decrease; without board, \$247 was paid, or \$8 less than in 1893, the West Midland group alone increasing its figures. Monthly wages in the working season are as follows: With board, \$16.65, or 58 cents less than in the year preceding, every group experiencing a decline; without board, \$25 61, which is 36 cents less than was paid in 1893, although the Lake Ontario group and the Northern Districts show an improvement compared with the previous year. Domestic servants on the farm average \$6.23 per month, or 23 cents less than was paid in 1893, the Northern Districts being the only group to show any advance in the rate.

DOMESTIC SERVANTS ON THE FARM.

FROM REMARKS OF CORRESPONDENTS.

Harwich, Kent : Good domestic servants are hard to get, as most girls think that hiring out to do house work degrades them.

Harwich, Kent : Domestic servants cannot be got. Girls flock to the towns where work is light and the hours short, and where they can parade the streets and patronize the amusements in the company and at the expense of some fool whom they expect to marry. They too often settle down in poverty and squalor, and a whole tribe of offspring is almost sure to follow. I cannot suggest a remedy. Human nature appears to prompt the course which most of them are bound to run to mad ruin.

Raleigh, Kent : Farmers' daughters are not going to hire out to be slaves for other people. If the town and city dames used them like white people they would not have so much trouble in getting them.

Malahide, Elgin : Farmers' daughters are leaving home to be trained at colleges, and fitted for other callings and the professions, leaving mothers without sufficient help. There is much need of good girls who have been trained for domestic service on the farm.

Sombra, Lambton : Domestic servants more plentiful than for years. Many have returned from the cities and larger towns.

Ashfield, Huron : The majority of our young people, both male and female, have gone to Michigan and other states to seek employment.

Ashfield, Huron : Regarding domestic servants, I would say that it is rather hard to "domesticate" them.

Keppel, Grey : A training school for girls would be a good institution.

Sydenham, Grey : Domestic servants are scarce and will be until society treats domestics with more respect.

Gwillimbury W., Simcoe : Girls would rather live in a village, town, or city, working at the needle on one meal a day than work in a farm house and be well fed and receive good wages. At the same time a great cry will be raised about the sweating system.

Sunnida'e, Simcoe : Domestic servants are not so scarce as during the last two years.

Ekfrid, Middlesex : We get along with the domestic help we have, and any importation of foreign labor is not desirable at present.

Oxford E., Oxford : Domestic servants are scarce about here. We must try and convince the girls that it is respectable to work out.

Downie, Perth : The domestic servant question will right itself when other lines of work into which girls go become so overcrowded that employment cannot be had.

Waterloo, Waterloo : Servant girls are out of the question, and will be so until the female tides shall change.

Waterloo, Waterloo : Domestic servants are scarce on farms and wages are high, as most of the girls of our generation don't like to wash, milk cows, or do any other kind of hard work.

Clinton, Lincoln : Our girls appear to be willing to do everything else but housework.

Grantham, Lincoln : It seems as if girls would rather go to the towns and cities and starve than to try their hands at hiring on a farm.

Trafalgar, Halton : Domestic servants are not so scarce as they have been for some years past, and wages are not so high. This is a result of the depression that prevails everywhere, and the necessity which compels people to economize.

Markham, York : About the only way to get domestic servants is to import from foreign countries, or engage married men on the farms whose wives could work, say, so many days in the week.

York, York : The supply is becoming more plentiful on account of so many economizing and doing without female help.

Clarke, Durham : Plenty of girls to marry, but few to hire on the farm.

Haldimand, Northumberland : Farmers should study some means of encouraging domestic servants to remain on the farm in the place of allowing them to be drawn into the towns and cities by inducements which do not always result to their advantage and real profit.

Portland, Frontenac : Domestic servants are scarce. We have plenty of young women, but they do not like housework.

Verulam, Victoria : Our girls seem inclined to seek employment in towns and villages. Perhaps if they had more society on the farm they would be more content to seek employment there.

Otonabee, Peterborough : It looks as if to be a domestic servant is too degrading for Canada's daughters.

PART IV.

LOAN AND INVESTMENT COMPANIES OF ONTARIO.

STATEMENT OF AFFAIRS.

The following report contains the returns made by 89 companies doing business in Ontario. In addition to the 86 reported for 1894, the following are contained herein :

Aid Savings and Loan Company Toronto.
 Birkbeck Investment Security and Savings Company Toronto.
 Provident Investment and Mortgage Guarantee Company . . . Toronto.
 Niagara Falls Building, Savings and Loan Association Niagara Falls.

The Ontario Investment Association of London has practically ceased to do business.

The following table shows the capital subscribed, the assets and liabilities of the eighty-nine companies for 1894, and for comparison similar totals are given for the previous seven years :

Location of head office of company.	Number of companies.	Capital sub- scribed.	Liabilities to stock- holders.	Liabilities to the public.	Total liabilities or assets.	Secured loan assets.	Property assets.

PART V.

CHATTEL MORTGAGES.

The returns relative to chattel mortgages are made, in accordance with the Statutes, to the Minister of Agriculture. The tabulation of these has been entrusted to this Bureau.

The following statement gives the number of chattel mortgages on record and undis- charged for the Province of Ontario for the year ending December 31, 1894 and the five preceding years :

Year ending Dec. 31.	To secure existing debt on present advance.		To secure future in- dorsation on advance.		Total.	
	No.	Amount.	No.	Amount.	No.	Amount.
		\$		\$		\$
1894	21,276	10,603,393	483	616,812	21,759	11,220,205
1893	19,342	8,973,118	380	360,267	19,722	9,333,385
1892	18,927	9,215,753	455	829,724	19,382	10,045,477
1891	18,902	8,595,417	516	908,971	19,418	9,504,388
1890	17,271	8,121,316	632	857,542	17,903	8,978,858

The following statement gives the numbers and amounts of chattel mortgages for the different districts of the Province for 1894 and previous three years :

Districts.	1894.		1893.		1892.		1891.	
	No.	Amount.	No.	Amount.	No.	Amount.	No.	Amount.
		\$		\$		\$		\$
Lake Erie	2,781	1,186,213	2,679	1,010,557	2,922	1,132,113	2,790	980,671
Lake Huron	2,288	728,750	1,953	664,621	1,847	630,015	1,993	657,862
Georgian Bay	2,271	862,708	2,080	778,813	2,120	936,409	2,006	723,291

THIRTEENTH ANNUAL REPORT
OF THE
ONTARIO BUREAU OF INDUSTRIES.

PART VI.

1894.

To the Honorable the Minister of Agriculture :

SIR,—I have the honor to present herewith Part VI. of the thirteenth annual report of the Bureau of Industries for 1894, containing tabulated statements of statistics of the municipalities of Ontario up to December 31, 1893.

The statistics of assessment, rate of taxation and population are compiled from returns made by municipal clerks, while the financial statements are tabulated from schedules furnished by municipal treasurers, after being checked over with the detailed reports of the municipal auditors. A large amount of correspondence was rendered necessary in order to rectify discrepancies.

I am obliged to report that the following officers had failed to forward returns in time for tabulation : *treasurers* of the townships of Enniskillen, Kaladar, Bastard and Burgess, Westmeath, Monteagle and Herschel, and Mattawan, and of the towns of Mattawa and North Bay ; *clerks* of the townships of Mara, and Bastard and Burgess and of the village of Lucknow. In these cases estimates have been made or statistics have been compiled from auditors' returns or other documents.

In the case of a few municipalities no reports were received from the auditors, and in some other cases the reports received were incomplete and of but little use, so that we have been compelled, in these cases, to accept the schedules as compiled by the treasurers and amended by correspondence.

I have the honor to be, sir,

Your obedient servant,

C. C. JAMES,

Secretary.

TORONTO,
August, 1895.

LETTER OF TRANSMISSION :	iii.
MUNICIPAL STATISTICS :	vii.
STATISTICS OF ONTARIO MUNICIPALITIES :	1
TABLE I. Detailed statement by local municipalities (townships, towns and villages) in the counties of Ontario for 1893, of the number of ratepayers, the area, the assessed values and amount of taxes imposed, as shown by the assessment and collection rolls, together with the average rate of taxes per head of population ; also, a comparative summary of the totals for the two years 1892-93.	2
TABLE II. Detailed statement of the cities, towns separated from counties, and other incorporated towns of Ontario giving statistics of assessment and taxation, as in Table I, for the three years 1891-93	21
TABLE III. Summary statement by counties (being the total of townships, cities, towns and villages within limits of county) of items from assessment and collection rolls as given in Table I.	28
TABLE IV. Summary statement for the Province of Ontario of the number of ratepayers and area, as shown by the assessment rolls, and of the assessed values and amount of taxes imposed, as shown by the collection rolls, together with the average rate of taxes per head of population assessed as resident, and rate in mills on the dollar of total assessed value for the eight years 1886 to 1893, classified as rural (townships), urban (towns and incorporated villages) and cities.	31
TABLE V. Showing for townships, town and village municipalities, grouped by counties, and for cities, the population of Ontario as taken by the municipal assessors in the two years 1892-3	32
TABLE VI. Showing an abstract statement of receipts, disbursements, assets and liabilities of the cities of Ontario for the three years ending December 31, 1891, 1892 and 1893	41
TABLE VII. Showing an abstract statement of receipts, disbursements, assets and liabilities of the county municipalities of Ontario for the three years ending December 31, 1891, 1892 and 1893.	48
TABLE VIII. Showing an abstract statement of receipts, disbursements, assets and liabilities of the town municipalities in the Province of Ontario for the three years ending December 31, 1891, 1892 and 1893	60
TABLE IX. Showing an abstract statement of the receipts, disbursements, assets and liabilities of the village municipalities in the Province of Ontario for the year ending December 31, 1893, and the totals grouped by counties for 1891, 1892 and 1893.	84
TABLE X. Showing an abstract statement of receipts, disbursements, assets and liabilities of the township municipalities in the Province of Ontario for the year ending December 31, 1893, and the totals grouped by counties for 1891, 1892 and 1893	106
TABLE XI. Summary statement showing the totals for the twelve cities of the Province of Ontario of the several items of receipts, disbursements, assets and liabilities for the eight years ending December 31, 1886-93	156
TABLE XII. Summary statement showing for all counties of Ontario the aggregate totals of the several items of receipts, disbursements, assets and liabilities for the eight years ending December 31, 1886-93	158
TABLE XIII. Summary showing the totals for all towns in Ontario of the several items of receipts, disbursements, assets and liabilities for the three years ending December 31, 1891, 1892 and 1893	160
TABLE XIV. Summary showing the totals for all villages in Ontario of the several items of receipts, disbursements, assets and liabilities for the three years ending December 31, 1891, 1892 and 1893 ..	161
TABLE XV. Summary showing the totals for all towns and villages in Ontario of the several items of receipts, disbursements, assets and liabilities for the eight years ending December 31, 1886-93	162
TABLE XVI. Summary statement showing the totals for all townships in Ontario of the several items of receipts, disbursements, assets and liabilities for the eight years ending December 31, 1886-93 ..	164
TABLE XVII. Summary statement showing for all municipalities of Ontario (including counties, townships, towns and villages), the total of the several items of receipts, disbursements, assets and liabilities for the eight years ending December 31, 1886-93	166
TABLE XVIII. Showing the number of steam boilers as placed on the assessment rolls in townships, towns, villages and cities of the Province for 1891, 1892 and 1893	168

PART VI.

MUNICIPAL STATISTICS.

The statistics of Ontario municipalities have been carefully compiled and are presented in a similar form to those in the report of last year.

Tables i. to iv. deal with assessed areas and valuation and the rate of taxation. Table v. refers to the population as taken by the municipal assessors. Tables vi. to xvii. treat of the financial transactions of the various municipalities, taking in order, cities, counties, towns, villages and townships. Table xviii. gives the number of steam boilers, the latest addition to the assessment roll. The latest figures in all cases are for the year ending December 31, 1893.

In a few cases it was necessary to give estimates so that all the organized municipalities are represented in the totals as follows: 488 townships, 12 cities, 96 towns, 135 villages and 38 counties; total 769, or six more than in 1892.

The following statement is compiled from the summarized tables iv., v. and xvii., and gives population, total assessment, amount of taxes imposed, the amount of bonded and floating debt, together with the amount paid each year by all the municipalities of the Province for interest for the eight years 1886-93:

Year.	Popula- tion.	Total assessment.	Taxes imposed for all purposes.			Bonded debt.		Floating debt.	Interest paid on loans and debentures.
			Total.	Rate per head.	Mills on the dollar.	Total.	Rate per head.		
		\$	\$	\$ c.		\$	\$ c.	\$	\$
1893.....	1,910,059	825,530,052	12,522,660	6 56	15.17	48,083,243	28 17	6,796,422	2,508,691
1892.....	1,909,527	825,211,127	11,803,570	6 18	14.30	47,166,962	24 70	6,469,899	2,482,156
1891.....	1,922,121	818,847,394	11,767,748	6 12	14.37	43,888,853	22 83	7,629,730	2,498,294
1890.....	1,917,544	798,616,271	10,897,485	5 68	13.65	40,720,985	21 24	8,387,186	2,240,692
1889.....	1,906,901	761,905,816	10,248,198	5 37	13.45	38,988,332	20 44	6,493,519	2,057,938
1888.....	1,880,145	748,654,570	9,919,962	5 28	13.25	34,729,527	18 47	6,437,363	1,999,760
1887.....	1,848,457	717,311,938	9,300,113	5 03	12.97	31,943,320	17 28	5,645,208	1,820,590
1886.....	1,823,495	694,380,659	9,009,385	4 93	12.97	29,924,863	16 37	4,841,717	1,715,620

The population and assessed values remain almost the same as compared with 1892, but the tax bills have increased at the rate of 38 cents per head of population over 1892 or an advance \$1.63 or 33 per cent. since 1886. The debenture debt shows an increase of \$7,362,268 in the past three years. Over 60 per cent has been added to this item since 1886. The interest charges are equivalent to one fifth of the taxes imposed.

The railway debentures have been reduced from \$6,729,155 in 1886 to \$5,079,604 in 1893.

The following table shows the growth of population by municipalities for eight years :

Year.	Townships.	Towns.	Villages.	Cities.	Total.
1893.....	1,096,984	293,946	130,099	389,030	1,910,059
1892.....	1,102,467	293,111	128,930	385,019	1,909,527
1891.....	1,116,347	290,675	128,634	386,465	1,922,121
1890.....	1,118,252	419,260		380,032	1,917,544
1889.....	1,130,060	409,168		367,673	1,903,901
1888.....	1,133,046	401,790		345,309	1,880,145
1887.....	1,140,138	385,731		322,588	1,848,457
1886.....	1,148,856	368,452		311,187	1,828,495

This is a comparative table for eight years for total assessed values :

Year.	Townships.	Towns.	Villages.	Cities.	Total.
	\$	\$	\$	\$	\$
1893.....	451,629,103	96,225,551	29,904,446	247,770,952	825,530,052
1892.....	452,065,658	95,997,881	29,423,327	247,724,261	825,211,127
1891.....	454,070,364	94,848,312	29,053,803	240,874,915	818,847,394
1890.....	452,467,088	118,906,490		227,242,693	798,616,271
1889.....	450,977,220	109,808,381		201,120,215	761,905,816
1888.....	460,615,822	103,738,543		184,300,205	748,654,570
1887.....	456,170,163	96,705,063		164,436,712	717,311,938
1886.....	452,097,645	91,458,923		150,824,091	694,380,659

The amount of taxes imposed in townships, towns, villages and cities is shown in the following for eight years :

Year.	Townships.	Towns.	Villages.	Cities.	Total.
	\$	\$	\$	\$	\$
1893.....	4,629,028	1,979,893	539,057	5,374,682	12,522,660
1892.....	4,599,442	1,914,803	531,987	4,757,338	11,803,570
1891.....	4,544,291	1,853,654	522,354	4,847,449	11,767,748
1890.....	4,473,108	2,232,294		4,192,083	10,897,485
1889.....	4,507,717	2,061,135		3,679,346	10,248,198
1888.....	4,494,780	1,955,817		3,469,365	9,919,962
1887.....	4,431,720	1,820,383		3,048,010	9,300,113
1886.....	4,388,401	1,732,386		2,888,598	9,009,385

The next table compares the debenture debt outstanding in the various municipalities on December 31, for each of eight years :

Year.	Townships.	Towns.	Villages.	Cities.	Counties.	Total.
	\$	\$	\$	\$	\$	\$
1893.....	3,039,823	8,463,849	1,137,967	33,102,012	2,339,592	48,033,243
1892.....	3,089,430	7,708,972	1,148,442	32,688,303	2,531,815	47,166,962
1891.....	3,118,639	6,952,937	1,057,489	30,012,277	2,747,511	43,888,853
1890.....	3,366,617	7,349,969		26,860,391	3,144,008	40,720,985
1889.....	3,299,557	6,628,697		25,839,218	3,220,860	38,988,332
1888.....	3,409,744	6,330,598		21,585,224	3,403,961	34,729,527
1887.....	3,151,428	5,472,286		19,869,715	3,446,891	31,943,320
1886.....	3,153,646	5,010,733		18,251,740	3,505,744	29,924,863

STATISTICS OF
ONTARIO MUNICIPALITIES.

ASSESSMENT AND TAXATION.

TABLE I. Detailed statement by Local Municipalities (townships, towns and villages) in the Counties of Ontario for 1893, of the number of Ratepayers, the Area, the Assessed Values and amount of Taxes imposed, as shown by the assessment and collection rolls, together with the average rate of taxes per head of population; also, a comparative summary of the totals for the two years 1892-93.

Municipalities.	No. of rate- payers.	No. of acres as- sessed.	Assessed values.				Taxes imposed for all purposes.	
			Real property.	Per- sonal pro- perty.	Taxable income.	Total.	Total.	Per head.

*Sudbury incorporated in 1893. †Hallam organized in 1893. ‡Macdonald and Meredith organized in 1893. § The rate per head of resident population in the municipalities of Neebing, Shuniah and Sault Ste. Marie would be misleading, as owing to circumstances the most of the taxes are paid by non-residents.

* Including renewals of short dated notes. †No details to separate accounts. ‡Including \$2,000 written off. §Value of sewers. ¶Owing to lack of details in the returns no further classification could be made. In 1890, \$23,832, the amount of sinking funds, then on hand, was deducted in the city treasurer's report, from the debenture liability. In the above report the gross debenture liabilities are given.
